This program serves as a foundation to prepare students for entry-level photographic employment in business, medical/scientific, art or for advancement by those already employed in some phase of photography or graphic art. Occupations in this field typically require an apprenticeship (assisting) for several years after graduation before higher-level jobs can be secured. This program is designed to lead directly to an occupation and is not intended for transfer. Some students may wish to pursue the program for personal enrichment rather than as a career program. **PLEASE NOTE, a portfolio will be required for a job interview.**

*Extensive Program changes have occurred. Students are asked to work with their faculty advisor to insure they are enrolled in the proper courses. Some of the advanced courses, i.e., ART 206, will be Closed to all registrants. Chair of department must determine student's eligibility for course enrollment prior to permission for enrollment
