

## PRESENTATION PROPOSAL: DEMONSTRATIONS & WORKSHOPS

We are accepting presentation proposals for the 2010 GIS Day now through September 30, 2010. Selected workshops and demonstrations will address some application of geospatial technology to environmental, economic, or social sustainability issues: energy, water resources, workforce, economic development, supply chain management, logistics, land use/planning, human services, and health care are topics we would like to see presented.

HACC can provide the workstation running Windows XP, Internet Explorer 7, ArcGIS 10, and Google Earth, Powerpoint 2007, and a projector and screen for your demonstration needs. Workshops and demonstrations are 45 minutes. A finalized schedule will be published.

Workshops and Demonstrations will start at 12:00 pm with the final demonstration ending at 5:00 pm.

Please print or type the following information:

Demo or Workshop Title and Description: \_\_\_\_\_
