WOODWORKING MACHINERY**

ADDENDUM #1

ANSWERS TO QUESTIONS

APRIL 11, 2008

Question 1:

ELECTRICS:

Before finalizing an order, we would need to know the electrical requirements. For example, the Safety Speed wide belt sander shows 208/230/460 volt in the description. One of the voltages would need to be given to place an order for this machine. Please advise.

Answer 1: Use 208 volt

Question 2:

MACHINE DESIGNATION:

The spread sheet shows a category for delivery cost (Fob destination). The bid is saying the machines would be delivered and put in place. Should this column include our service to put the machines in place? Please advise.

Answer 2:

Yes. Just to clarify – delivery instructions are to delivery the machinery to the Midtown II Campus and take to the woodshop room and set as instructed.
