Question 1: You are asking the printer to bid on mailing and fulfillment from a names and address mailing list that we are thinking will need to be pre-sorted from your supplied list and ink jetted per the pre-sorted list, and prepped for mailing. However, you are also stating that we need to follow the regulations as outlined in section M045 which is a simplified mailing. According to our mail services division that M045 is an old reference and has been replaced with a DMM 602.3.2 . We need you to clarify if we are mailing under the simplified mailing service using the DMM 602.3.2 form from your supplied mail list or mail as a pre-sort standard mailing from your supplied list? Thank you.

Answer 1: Mail as a pre-sort standard mailing from our supplied list.
