

My name is Kristianna West, and this is my third semester at HACC. I would say it's been an overall really good experience. I've become involved, I've become a tutor here in the Learning Center, I tutor English and biology, and I guess HACC has just been a great experience because the staff and everyone, they're so welcoming and warming and they just, they encourage you to pursue your dreams. Yeah, it's just been an amazing experience.

HACC just seemed like, financially, the best option for me at the time when I was considering college. And it's, yeah, it's been a whirlwind, it's been awesome.

So, my major is pre-dental hygiene, so I haven't started clinicals yet, but I'm just really excited to like help people to just show them that if you have clean teeth and that your smile is beautiful, you can smile, you can have joy and just encourage people to be happy.

I want to be someone who brings like happiness that there doesn't need to be fear with the dental field and that it's a good experience as long as you have caring people that are there with you.

The experience, the people, the welcoming...just the atmosphere, it's so conducive to learn and it's awesome. I love it. I love my professors, they just, they're engaging and we just enjoy the day. We're laughing, we're enjoying our time here. So yeah, I would totally recommend HACC.
