

My name is Mona, I'm a student at HACC. I love that school, I love all three of my professors, I'm excited about being on Zoom, they are teachers that...that you just don't mind listening to. I've been here three semesters and I don't have anything negative to say about any of them. I love learning, and they love teaching.

The president of the college is very caring. I ran into him in the hall one day. He has such a beautiful heart and act of kindness. I appreciate him as a president of the College; I'm very thankful for him.

I wasn't doing good in math, but thanks to Professor Elkiss, I am doing wonderful in math right now! I had remedial classes, the tutoring center is great, they work with you, they take time with you, um, they just have so many programs for you and so many initiatives, and you know, everybody works with you.

I'm supposed to graduate this December, so if I pass all my classes, and so far so good, I will graduate from HACC.

Thank you! Have a good day and be good to yourself.
