

Fund for Excellence in Health Care

HACC, Central Pennsylvania's Community College, offers more than 30 healthcare programs. We are committed to preparing healthcare providers who are patient-centered, respect and embrace diversity and are curious and dedicated to continuous improvement by infusing real-world lessons into a challenging curriculum. With YOUR help, students enrolled in HACC's healthcare programs could benefit from the most innovative equipment and programs such as:

-  EKG machines, teaching stethoscopes and other necessary equipment for students in the Medical Assisting Program, which has a 100-percent job placement rate
-  State-of-the-art Radiologic Informatics Server lab on the Lancaster Campus to allow students to work with the Picture Archive and Communication System (PACS) server
-  Phase Contrast Inverted Infinity Scope for students in the Medical Laboratory Technician Program
-  Upgraded simulation mannequins and iPads for the students in the Paramedic-Emergency Medical Services Program

HACC has remained on the cutting-edge in healthcare programs, but the technology in this field is constantly changing. YOU can provide students with the most innovative equipment and training by visiting hacc.edu/GiveNow to make a gift to the Fund for Excellence in Health Care.

For more information, please contact the HACC Foundation at foundation@hacc.edu.

"The Fund for Excellence in Health Care will allow our programs to stay current with leading technological trends and best practices being used in healthcare settings and enable us to graduate students that are prepared to meet the highest standard of service delivery in the healthcare workforce."

- Kathleen T. Doherty, Ph.D., Associate Provost at HACC
