HACC
CENTRAL PENNSYLVANIA'S COMMUNITY COLLEGE

HACC Foundation

Dear HACC Foundation donors,

We hope you are well.

Your impact on HACC, Central Pennsylvania's Community College, our students and the Central Pennsylvania community is greatly appreciated. We thank you for your support!

See how your generosity has helped our students with scholarships and emergency assistance funds:

- The HACC Foundation awarded $1,019,213 in scholarships to 717 students last fiscal year (July 1, 2024-June 30, 2025). These students are more likely to complete their HACC credentials and graduate with less debt because of your generosity.
- The HACC Foundation awarded $66,048 in emergency assistance funds to 123 students last fiscal year (July 1, 2024-June 30, 2025). Students who received these funds faced crises and emergencies that, without your support, would have prevented them from continuing their educational journey at HACC.

Your continued support impacts all of our campuses, students and many initiatives that would not have happened without your generosity.

We have selected some of the most recent initiatives and included them in this publication so you can see your gifts at work.

Thank you for believing in HACC students! The power of your generosity truly makes a difference.

GlideScope

The Respiratory Therapist Program received funding from the HACC Foundation to support the purchase of a GlideScope device. This device is used in hospitals to ensure proper placement of endotracheal tubes during intubation and to perform bedside bronchoscopies. HACC respiratory students will gain exposure to this device on a regular basis, helping them become familiar with the device and prepared to assist physicians. Access to the GlideScope also improves the student's working relationship with the physician and helps to increase HACC respiratory students' credibility in the eyes of the pulmonary physicians.

Nanofabrication Manufacturing Technology

HACC sent six students to the capstone semester at the Pennsylvania State University in State College.

Students learned about the semiconductor manufacturing process and trained using the industry's best cleanroom laboratory equipment.

There is a need for a trained workforce in the nanofabrication industry since the passage of the CHIPS and Science Act in August 2022. Heightened international tensions have strengthened the argument that production of electronic components, semiconductive devices and pharmaceutical manufacturing that supports and contributes to the U.S. workforce and economy should remain based in the United States.. The industry needs a highly skilled workforce capable of handling cleanroom equipment and with a strong understanding of nanofabrication processes.

This capstone semester provides this training and is highly recognized both locally and nationally. These 18 credits are required for completion of HACC's Nanofabrication Manufacturing Technology Associate Degree.

Enhancements to Emergency Medical Services (EMS) and Fire

Through the support of HACC Foundation donors, the EMS and Fire units of HACC's School of Public Service launched a successful initiative to enhance its fire and EMS workforce development programs by investing in state-of-the-art training equipment. This project directly supported the College's mission by creating opportunities and transforming lives to shape the future–together and significantly improving hands-on learning opportunities for students preparing for public safety careers.

Artist Lecture by Mike McQuad

Mike McQuade is a U.S.-based artist and illustrator who spends his time making collages and illustrations for a wide range of clients, such as the Atlantic, the New Yorker, the New York Times, Criterion Collection, the Washington Post, New York magazine, NPR, Knoll, Apple and Nike, to name a few.

His work has been recognized by the American Institute of Graphic Arts, American Illustration, the New York Times, Communication Arts and the Art Directors Club.

Beds for Nursing Lab

The beds for the nursing lab improvement project at HACC, supported by HACC Foundation donors, resulted in meaningful upgrades to HACC's learning spaces, which provides significant benefits to our students. The project ensures that our nursing labs could be used to their full potential, with enough fully functional beds available for every student during testing and practice. Having adequate equipment is essential for students to learn and demonstrate proper body mechanics, safe handling techniques and foundational skills that will carry into their nursing careers. The updates ensure that both students and staff could rely on every bed in the lab and create an environment where hands-on learning can occur safely, correctly and consistently.

Intercollegiate Uniforms

The HACC Hawks recently received a significant boost through the purchase of new athletic uniforms and team travel gear, made possible by generous funding from HACC Foundation donors. This investment was aimed at elevating the experience of our student-athletes, strengthening team pride and enhancing the visibility of HACC Athletics both on and off campus.

The new uniforms provide a refreshed and professional look for our teams and instill a greater sense of unity and confidence among student-athletes. For many Hawks, representing HACC now feels even more meaningful as they wear updated, high-quality gear that reflects the College's spirit and excellence. Additionally, the new travel apparel ensures the teams present a cohesive, professional image when competing at other institutions, which helps build a strong and recognizable HACC brand.
