Right now I am working in my home. I have a very flexible schedule. For my life with four children, this is perfect for me. I know there are many people out there with Bachelor's degrees and some even Masters degrees that are not earning the income that I am right now.

As massage therapists, we're a steward of an ancient art and science. And HACC really combined those two part together.

I think it's definitely doable for anybody who hasn't been in a college even, you know, people that haven't been to college since high school they haven't been in school.
