STUDENTS IN NEED OF ACCOMMODATIONS:

Students with disabilities who are in need of accommodations should contact the campus disability coordinator listed below. Coordinators for each campus are listed here:
http://www.hacc.edu/Students/DisabilityServices/Contact-Disability-Services.cfm

EEOC POLICY 005:

It is the policy of Harrisburg Area Community College, in full accordance with the law, not to discriminate in employment, student admissions, and student services on the basis of race, color, religion, age, political affiliation or belief, gender, national origin, ancestry, disability, place of birth, General Education Development Certification (GED), marital status, sexual orientation, gender identity or expression, veteran status, genetic history/information, or any legally protected classification. HACC recognizes its responsibility to promote the principles of equal opportunity for employment, student admissions, and student services taking active steps to recruit minorities and women.

The Pennsylvania Human Relations Act (‘PHRAct’) prohibits discrimination against prospective and current students because of race, color, sex, religious creed, ancestry, national origin, handicap or disability, record of a handicap or disability, perceived handicap or disability, relationship or association with an individual with a handicap or disability, use of a guide or support animal, and/or handling or training of support or guide animals.

The Pennsylvania Fair Educational Opportunities Act (“PFEOAct”) prohibits discrimination against prospective and current students because of race, religion, color, ancestry, national origin, sex, handicap or disability, record of a handicap or disability, perceived handicap or disability, and a relationship or association with an individual with a handicap or disability.

Information about these laws may be obtained by visiting the Pennsylvania Human Relations Commission website at http://www.phrc.pa.gov/Pages/default.aspx#.V2HOujFuNS0.

HARRISBURG AREA COMMUNITY COLLEGE NURSING PROGRAMS PHILOSOPHY

The beliefs of faculty of the Nursing Programs are congruent with the mission and goals of the College.

PERSON
Persons are unique holistic beings with complex physiological, psychological, cultural, social, ethical, and spiritual dimensions. Each person’s response to internal and external factors influences his/her attainment of hierarchical human needs. Persons have inherent worth and deserve respect and the right to self-determination. As a member of society, each person has responsibility and accountability to others.

ENVIRONMENT
A person’s environment includes developmental changes, internal and external stressors, spiritual, biological, physiological, cultural, socioeconomic, and political forces. There is a dynamic interaction between the person and the internal and external components of her/his environment. It is the adaptation to these changes which affects overall health.

HEALTH
Health is a dynamic state ranging from optimal wellness to death. The degree of health a person experiences is directly affected by internal and external environmental factors. Individual health is defined by the interaction of those factors, recognizing the patient’s preferences, values and needs.

NURSING
Nursing as a profession empowers individuals, families and society to achieve their highest possible level of health. Nursing practice is guided by an interactive process with the person, resulting in individualized interventions that are holistic and ethical. Nursing is committed to the values of respect, caring, communication, collaboration, critical thinking and both technological and clinical competence.

NURSING EDUCATION
The faculty is committed to excellence in nursing education. Nursing education is a shared responsibility between faculty and students and provides the foundation for lifelong learning. The faculty believes that evidence-based practice, critical thinking skills, and self-direction are integral to nursing education and practice.

Learning is a complex, interactive process of growth, during which students acquire knowledge, self-awareness, and develop a professional role. Mutual sharing of ideas supports the personal and professional growth of both students and faculty.

The faculty recognizes the NLN Core Competencies for Graduates of Associate Degree Nursing Programs and Core Competencies of Graduates of Practical Nursing Programs as organizing frameworks for educational outcomes. Graduates of both the practical nursing and associate degree nursing programs must function in accordance with their respective standards of practice, the Nurse Practice Law, and Nurse Practice Act of their state.

In this document, we are using the word patient to designate patient, client, resident, family, or community; any one individual or group of individuals receiving and participating in health care.
The conceptual framework underlying the curriculum of HACC – Central Pennsylvania’s Community College represents the conceptualization of the faculty’s view of nursing and nursing education. It is an eclectic view that incorporates concepts from various nursing theories and disciplines. The roots of the conceptual framework spring from the nursing program philosophy statement and are consistent with the mission of the college. Components included in the philosophy are Person, Environment, Health and Nursing Education.

The curriculum is built upon four core concepts, which act as a foundation for the organization of the educational course content within the various levels of the nursing program. The development of these four core concepts is derived from the *NLN Core Competencies for Graduates of Associate Degree Nursing Programs* and the *NLN Core Competencies of Graduates of Educational Programs in Practical Nursing*. These four core concepts, which reflect the faculty’s contribution, are Professionalism, Communication, Critical Thinking and Caring.

From these four core concepts, the curriculum content is organized into four Client Needs categories. These Client Needs categories act as a link between nursing education and clinical practice. These Client Needs categories, based upon the *NCLEX-RN and NCLEX-PN Test Plans* are: Safe and Effective Care, Health Promotion and Maintenance, Psychosocial Integrity, and Physiological Integrity. They are consistent with expectations for licensure and state law/rules and include an emphasis on nursing interventions and identified competencies of a graduate nurse.

The faculty further identified nine key components, which will act as threads throughout the curriculum and come from definitions found in the Nursing Program Philosophy. These nine key components are Clinical Competence, Life-Long Learning, Nursing Process, Evidence-Based Practice, Health Continuum, Life Span, Developmental Stages, Holism and Ethical Practice.

The conceptual framework is best understood through the description of and elaboration upon the four core concepts and their components.

**Professionalism:**
Professionalism within nursing practice is characterized by a commitment to the profession of nursing. The graduate of a nursing program at Harrisburg Area Community College (HACC) uses legal, ethical, and regulatory frameworks, in addition to the nursing process, to provide evidence-based care. By adhering to the standards of professional practice and accepting responsibility and accountability for individual actions, the graduate nurse will demonstrate clinical competence. Professionalism includes empathy for others as demonstrated by the ability to care for diverse patients. This is also reflected by the graduate’s ability to value the profession of nursing and development of professional identity and continued professional growth.
Communication:
Communication in nursing is a goal-directed interactive process where information may be exchanged verbally, non-verbally, in writing, or by the use of informatics. Effective communication must take into consideration relationships, family dynamics, cultural influences, developmental stages, spirituality, and patient needs. Therapeutic communication assists with adaptation to change, development of interpersonal relationships, and the integration of new information. The goals of therapeutic communication are to develop trust, obtain or provide information, show caring, and explore feelings. When communicating, it is important that all forms of communication are congruent in order to facilitate understanding of the message. Nursing can have a positive influence on health through effective communication with patients. Collaborative communication is demonstrated by respectful interactions with the entire health care team.

Critical Thinking:
Critical thinking in nursing uses evidence-based practices and the nursing process to accurately collect, assess, analyze, and integrate information in order to formulate nursing judgments and direct positive patient outcomes. The merging of critical thinking and the nursing process results in the nurse’s ability to accurately problem-solve, and safely implement and evaluate a plan of care. Critical thinking incorporates self-reflection, intuition, and clinical reasoning, resulting in a transformative process, in which nurses can provide effective patient care.

Caring:
Caring is the fundamental ethic of the holistic healing relationship between nurse and patient. Within this relationship, caring behaviors by the nurse provide a safe, compassionate, nurturing environment. These behaviors encompass both direct physical care of the client as well as emotional caring behaviors of touch, presence and psychological support. Caring acknowledges the dignity of each patient and respects individual values, beliefs and cultural influences as the client and nurse interact. Caring also includes information interventions such as teaching, health promotion and assisting the patient to navigate the health care system. Caring should ultimately result in the outcome of the patient achieving an optimal level of wellness and function. These caring interventions are based on sound nursing judgment.

The four Patient/Client Needs categories are best understood through the definitions provided in the NCLEX-RN and NCLEX-PN Test Plans.

Safe and Effective Care:
The registered nurse promotes achievement of patient outcomes by providing patient-centered nursing care, in accordance with National Patient Safety Guidelines, to protect patients and other health care personnel.

The practical nurse collaborates with health care team members, in accordance with National Patient Safety Guidelines, to facilitate effective patient-centered care, to protect patients and other health care personnel.
Health Promotion and Maintenance:
The registered nurse directs and provides patient-centered nursing care that advocates for the patient in ways that promote human dignity, self-determination, physiological/psychological integrity and ongoing personal growth as a human being.

The practical nurse promotes human dignity, self-determination, physiological/psychological integrity and personal growth of the patient, oneself and members of the health care team.

Psychosocial Integrity:
The registered nurse directs and provides patient-centered nursing care that promotes and supports the emotional, mental, and social well-being of the patient.

The practical nurse provides patient-centered nursing care that promotes and supports the emotional, mental and social well-being of the patient.

Physiological Integrity:
The registered nurse promotes physical health and wellness by providing patient-centered care and comfort, reducing risk potential for the patient and assisting them with health alterations.

The practical nurse assists in the promotion of physical health and well-being by providing patient-centered care and comfort, reducing risk potential for the patient and assisting them with the management of health alterations.

The nine key components are defined as:

Clinical Competence:
Nursing graduates demonstrate clinical competence through the use of nursing judgment and evidence-based practice. Clinical competence includes an understanding of the legal boundaries in which nurse’s function. The ability to practice with competence is inherent to the nursing code of ethics.

Life-Long Learning: Learning is a life-long process based on intellectual curiosity which allows nurses to grow professionally and personally and to progress to the highest educational and practice levels of which they are capable. Life-long learning occurs through continuing education, self-study, and constant inquisitiveness about individual and collective nursing practice, and the nursing profession itself. Nurses who are lifelong learners possess a spirit of inquiry. They have the ability to access and manage information, and to analyze, evaluate, and adapt it to practice.

Nursing Process:
The Nursing Process is the application of the scientific method as a guiding framework to support nursing judgment.
Evidenced-Based Practice:
Evidence-Based Practice is the conscientious use of best current evidence based on nursing research in order to make decisions regarding patient care. This approach to decision making provides the nurse an opportunity to render the highest quality of care in meeting the needs of the patients.

Life Span:
Life begins in utero and concludes with death.

Health Continuum:
Health is a dynamic state throughout the life span. This range is viewed as the Health Continuum. The nurse provides care to individuals at every level of health in collaboration with the patient and other members of the health care team.

Developmental Stages:
Development is a multidimensional process with distinct and overlapping phases. Nurses engage in the promotion of human flourishing to the patients of all ages. Nurses serve as advocates for patients to promote their self-determination, integrity and ongoing growth as human beings. During developmental stages, distinct nursing judgments and actions are necessary to promote health and to improve the quality of life.

Holism:
Persons are complex beings with diverse interacting biological, psychosocial, cultural and spiritual dimensions. Holism in nursing care attends to all of these dimensions in promoting, maintaining, or restoring health. Nurses utilize this holistic framework as part of the nursing process in order to individualize caring interventions for patients.

Ethical Practice:
The nursing profession is grounded in moral values defined in the ANA Code of Ethics including self-determination, personal growth, and integrity. Respect for persons, responsibility, accountability, and honesty are integral to the practice of nursing and the nurses’ professional identity. Nurses apply these fundamental ethical standards to their nursing practice in order to provide nursing care which recognizes the profession’s contract with society.
**Associate Degree Program Outcomes ADN-RN**

The AD graduate, at the completion of the nursing program will demonstrate:

**Professionalism**
Possess a sense of **professional identity** and a commitment to the profession of nursing
- Qualify for NCLEX-RN Licensure Examination
- Demonstrate self-awareness, respect and value for differing perspectives and expertise of all **health care team members**.
- Adhere to the standards of professional practice
- Demonstrate accountability for individual actions
- Consistently demonstrate **ethical behavior**
- Manage **safe**, competent, **patient-centered care**
- Commit to **life-long learning**, possessing a **spirit of inquiry** which encourages continued personal and professional growth

**Communication**
Communicate effectively, in a therapeutic way with the patient, promoting human dignity, integrity, and **human flourishing** across the **life span**
- Communicate **collaboratively** and respectfully with other members of the **health care Team**
- Communicate information
  - Verbally
  - Nonverbally
  - In writing.
- Utilize **informatics** to provide **patient-centered care**
- Utilize information interventions to promote health and assist the patient in the navigation of the healthcare system

**Critical Thinking**
Demonstrate problem solving using the **nursing process** and **evidence-based practice**.
- Provide **patient centered care** utilizing the **nursing process**
- Utilize **evidence-based practice** as a basis for formulating nursing judgments
- Demonstrate critical thinking to deliver **clinically competent** care in accordance with the national patient **safety** initiative

**Caring**
Engage in caring behaviors to provide a **safe**, compassionate, nurturing environment that promotes **human flourishing**
- Provide holistic care, across the **health continuum** that reflects the patients’ values, cultures, and lifestyles

(Bolded and underlined words...bolded words reflect NLN competencies, while bolded underlined words reflect QSEN competencies.

**Bold and italicized words are concepts that thread throughout the Harrisburg Area Community College Nursing Program Conceptual Framework**.)

Nursing courses must be completed with a ‘C’ or better to progress through the nursing program.
Practical Nursing Program Outcomes PN

The Practical Nursing Program Outcomes are derived from the four core concepts and nine key components of the Conceptual Framework.

Qualities and characteristics that graduates will possess on completion of the nursing program include: The ability to:

Professionalism
- Quality for NCLEX-PN Licensure Examination.
- Participate in life-long learning.
- Demonstrate ethical behaviors in nursing practice.
- Demonstrate accountability in nursing practice.

Communication
- Communicate effectively with client, family and colleagues.

Critical Thinking
- Utilize the Nursing Process to assist in the provision of developmentally appropriate care to clients with common, well-defined health problems throughout the life span.
- Demonstrate critical thinking using the Nursing Process to assist in the delivery of clinically competent care.
- Collaborate in providing client care utilizing evidenced-based practice.

Caring
- Provide holistic care that reflects the client’s values, cultures, and lifestyles.
- Engage in caring behaviors to help achieve desired therapeutic outcomes.
- Promote comfort and optimal level of functioning along the health care continuum.

(Bolded and underlined words...bolded words reflect NLN competencies, while bolded underlined words reflect QSEN competencies. Bold and italicized words are concepts that thread throughout the Harrisburg Area Community College Nursing Program Conceptual Framework).

Practical nursing students must attain a grade of “C” or better in Nursing 100, 101, 102, Biology 111, Biology 100 and maintain an overall 2.0 GPA in order to continue in the program and to receive a certificate.
NON-DISCRIMINATION POLICY

It is the policy of Harrisburg Area Community College, in full accordance with the law, not to discriminate in employment, student admissions, and student services on the basis of race, color, religion, age, political affiliation or belief, gender, national origin, ancestry, disability, place of birth, General Education Development Certification (GED), marital status, sexual orientation, gender identity or expression, veteran status, or any legally protected classification.

All instances of discrimination are considered to be a serious offense and warrant immediate action. There will be no assignment of students based on race or other protected characteristics.

Any student who believes he/she is being subjected to discrimination should report the situation to the appropriate authority as described below.

Procedure:

Step 1. Concerns should be discussed with a faculty member. In instances when a student perceives a serious misconduct by the faculty member that would not be appropriate to address initially with that person; the student may begin at the second step of this process. The person at the second step may, however, refer the student back to the instructor if appropriate.

Step 2. Unresolved concerns should be taken to the Campus Director of Nursing.

Step 3. Unresolved problems will be directed to the Campus Dean.
ESSENTIAL QUALIFICATIONS FOR HEALTH CAREERS PROGRAMS
NURSING AND PRACTICAL NURSING

All individuals, including persons with disabilities, who apply for admission to the Nursing program must be able to perform specific essential functions with or without reasonable accommodation.

The following outlines the abilities and behavioral characteristics necessary for the student to be admitted to, continue in, and graduate from, the Nursing program at HACC. These essential qualifications are standards of admission.

The applicant should carefully review the essential qualifications for the program and ask questions if not familiar with the activities or functions listed. The applicant must decide if he or she has any limitations that may restrict or interfere with satisfactory performance of any of the requirements. It is ultimately the applicant’s responsibility to meet these essential qualifications if accepted into the program.

The applicant should consult with the program director to discuss any individual situation if he or she may not be able to meet these essential qualifications. Requests for reasonable accommodation will be considered. Contact the program director if you have any questions about this matter.

COMMUNICATION
1. Communicate verbally using clear and effective English
2. Write legibly in clear and effective English using correct grammar, punctuation and spelling
3. Quickly and accurately comprehend and follow verbal instructions in English
4. Quickly and accurately read, comprehend and follow written instructions in English
5. Actively participate in group discussions
6. Use communication equipment – telephone, computer, other device used for communication.

PHYSICAL SKILLS
Possess fine and gross skills sufficient to handle equipment and provide safe and effective patient care
1. Exert maximum physical force to lift, push, pull or carry objects up to 50 pounds (oxygen cylinders, beds, patients, or any other type of equipment)
2. Move quickly, freely and safely around the assigned work area and patient care settings
3. Sustain professional activities for up to 8 or more hours
4. Reach above shoulder level (to manipulate equipment)
5. Reach below waist level (to manipulate equipment)
6. Move upper and lower extremities, back, hips, and knees without restriction - bend, stoop, and squat
7. Keep hand and arm steady while moving arm or while holding arm and hand in one position
8. Make precisely coordinated movements of the fingers of one or both hands to grasp, manipulate, or assemble very small objects
9. Coordinate two or more limbs (for example, two arms, two legs, or one leg and one arm) while sitting, standing, or lying down

OBSERVATION AND SENSORY SKILLS
1. Hear, comprehend and interpret conversation and sounds not solely based on visual cues (including alarms, monitors, faint sounds, such as heart and breath sounds, taking blood pressure)
2. Ability to see details at close range (within a few feet of the observer) and at a distance
a) Function efficiently in various degrees of light, from dark to bright lighting
b) Differentiate colors, varying shades of same color, and shades of black, white and gray
c) Read fine print and hand writing
3. Detect and distinguish odors from clients and environment
4. Distinguish textures, degrees of firmness, temperature differences, pulse rate and vibrations; feel anatomical landmarks and veins
5. Distinguish and describe patient affect, body language and physical responses which the patient cannot verbally relay (i.e. facial expressions, sweating, trembling, color change, bleeding, etc.)

**INTELLECTUAL, COGNITIVE, AND CRITICAL THINKING SKILLS**

1. Concentrate on a task over a period of time without being distracted
2. Apply principles of critical, logical thinking to define problems, collect data, establish facts, and draw sensible and valid conclusions
3. Combine pieces of information to form general rules or conclusions (includes finding a relationship among seemingly unrelated events).
4. Perform multiple tasks simultaneously
5. Arrange things or actions in a certain order or pattern according to a specific rule or set of rules (alphabetize)
6. Integrate information quickly, consistently, accurately, especially in an emergency situation

**BEHAVIORAL / SOCIAL SKILLS / ETHICS**

1. Display a high level of professionalism and discretion in all actions and communication (written, oral and electronic)
2. Function effectively and display integrity, poise and emotional stability under stress (emergency, critical, or dangerous situations) in actions with all (peers, patients, staff, and faculty)
3. Use team approach to carry out responsibilities
4. Respond to all persons sensitively and with respect for cultural diversity
5. Maintain general good health and self-care
6. Display flexibility and adapt to changing environments
7. Manage time effectively
8. Accept responsibility for own behavior and be forthright about errors or uncertainty
9. Refuse to perform or participate in any illegal, unethical or incompetent acts, to include but not limited to the following: falsifying or knowingly making incorrect entries into a patient’s record or related document; copying other student’s written assignments; cheating on a quiz or examination; making untrue statements to a faculty member or administrator
10. Monitor/assess performance of self, other individuals, or organizations to make improvements or take corrective action
11. Capable of developing mature sensitive and effective relationships (with patients, staff, coworkers, etc.)

**Legal Qualifications**

**Legal Qualifications for Nursing Programs** – Students entering nursing programs will be required to undergo an annual Pennsylvania Child Abuse History Clearance, FBI Check, and State Police Criminal Record Check. These clearances will be due yearly, and due dates will vary by campus, and program of admission. No student will be admitted or retained in the program with a disqualifying criminal history or child abuse clearance.
Legal Limitation on Qualification for Licensure - The Professional Nursing Law of the Commonwealth of Pennsylvania states that the Board of Nursing may refuse to license a person who has been found guilty or pleaded guilty to felony charges. The application for licensure asks, "Have you been convicted * of a misdemeanor, felony; felonious act; an illegal act associated with alcohol, an illegal act associated with substance abuse(s)?"

*Convicted includes judgment; admission of guilt; pleas of nolo contendere; probation without verdict; incomplete ARD (this refers to both RN and LPN licensure applications)

Applicants should be aware of these limitations prior to entering the nursing programs. Practice of deceit in the application procedure is cause for dismissal from the program.

As an applicant to this program or student in this program, I acknowledge that I have read and understand the essential qualifications. I acknowledge that I am capable of performing the abilities and skills outlined in this document with or without reasonable accommodation and understand that my status as a student in this program depends on my continued ability to successfully demonstrate these abilities and skills. I understand that if I am no longer able to meet these essential qualifications I will immediately notify the program director. _____ (Initial)

I have read and understand the program admission criteria as posted on the HACC Health Careers website. _____ (Initial)

I have read and understand the Legal Qualifications for Nursing Program and Licensure. _____ (Initial)

I understand that all students accepted into the clinical component of the program must undergo a physical and a drug and alcohol screen annually at the student's expense at the laboratory specified by the program on or before the stated deadline. This lab is used to protect the integrity of the results being reported. The test is at the cost of the student. No student will be admitted or retained in the program with a disqualifying result or failure to meet the specified deadline. _____ (Initial)

I have read and understand the Health Careers Code of Ethics as posted on the HACC Health Careers website. _____ (Initial)

I have read and understand the Prohibitive Offense Procedure as posted on the HACC Health Careers website. _____ (Initial)

I understand that some clinical sites do not allow tobacco use and may require testing at the student’s expense. _____ (Initial)

I understand that all students accepted into the clinical component of the program must undergo an annual Pennsylvania Child Abuse History Clearance, FBI Check, and State Police Criminal Record Check at the student's expense. No student will be admitted or retained in the program with a disqualifying criminal history or child abuse clearance. _____ (Initial)

I understand that students accepted into the clinical component of the program may perform procedures which may expose them to bloodborne and airborne pathogens, ionizing radiation and potentially hazardous materials. _____ (Initial)

I understand that all students accepted into the clinical component of the program must have the following immunizations (at the student's expense): MMR, DPT, Varicella, an annual TB screen, and an annual influenza vaccination. Due date for influenza vaccine will vary and will be announced per campus. ________ (initial)

I understand that intentional deceit or falsification on this document will disqualify a student from admission and/or continuation in any health career program at HACC. _____ (Initial)

Have you ever been admitted to another health career program at HACC or another college from which you did not graduate?

_____ I have not _____ I have (Good Standing Form to be completed)

GENERAL PROGRAM/CLINICAL REQUIREMENTS

In order to participate in clinical experiences, all students are required to meet the health and immunization requirements of the HACC and the clinical institutions.

1. Completed physical examination forms must be submitted as required by the Director of the Nursing Program.

2. Some of the health requirements are listed on the Legal/Physical/Emotional Requirements of the Nursing Profession and Program. All of the health related requirements for HACC are included on the Health Form and the Returning Student Health Form.

3. Other clinical requirements include evidence of immunity by date of the disease, immunization dates and/or lab titers to Rubeola, mumps, varicella, rubella, Hepatitis B. It is required that students also be current with immunizations for Hepatitis B, Diphtheria, Tetanus, and Influenza. Students are also required to begin the program with two-step TB screening and have annual screenings during their time in the program. In the event of a positive TB screening see “Students with Positive Skin Tests for Tuberculosis or Allergies to Tuberculin Vaccine.”

4. Students are required to carry their own health insurance to cover incidents of illness/accident occurring during the Nursing Program. Students are responsible for any bills incurred during clinical.

5. Students are required to have current adult, child and infant professional rescuer CPR Certification valid through the academic year. No student will be allowed in the clinical area until this requirement has been met.

6. Students must adhere to the dress code procedure.

7. Students must adhere to Preparation for Clinical Experience, as printed in the Clinical Performance Evaluation.

8. A Pennsylania State Police request for Criminal Record Check, PA Child Abuse History Clearance FBI Clearance, a twelve panel drug screen, and annual TB screening results must be on file prior to the beginning of the semester and yearly while in the nursing clinical program.

9. Parking during clinical is defined by the clinical agencies and students must comply with the procedures.

10. All Clinical locations and assignments will be made at the discretion of the faculty.
STUDENTS WITH POSITIVE SKIN TESTS FOR TUBERCULOSIS OR ALLERGIES TO TUBERCULIN SKIN TESTING
For students attending the nursing program, it is important to insure that appropriate screening for Tuberculosis takes place. For students with a documented positive skin test or for students with allergies to tuberculin testing, the following process is required.

New students entering the program with a positive skin test for tuberculosis must have a follow-up two-view chest X-ray. This chest X-ray must have been completed within 2 years of the admission start date for the program.

- If that X-ray is positive, the student must follow his/her primary care provider’s recommendations and can participate in clinical only with documentation from his/her primary care provider stating the student is not contagious for tuberculosis.

- If the chest X-ray is negative, the student must submit annual TUBERCULOSIS STATUS SCREENING results using the HACC Tuberculosis Status Screening form. This form is required yearly to meet the documentation requirements for the nursing program.

For students with an allergy to tuberculin skin testing, the student must follow the same procedure. A chest X-ray must have been completed within 2 years of the admission start date for the program.

- If that X-ray is positive, the student must follow his/her primary care provider’s recommendations and can participate in clinical only with documentation from his/her primary care provider stating the student is not contagious for tuberculosis.

- If the chest X-ray is negative, the student must submit annual TUBERCULOSIS STATUS SCREENING results using the HACC Tuberculosis Status Screening form. This form is required yearly to meet the documentation requirements for the nursing program.
Nursing and Health Careers Regulation on Drug/Alcohol Screening

Initial and Annual Screening

All nursing and health career students will be required to have laboratory screenings for drugs and alcohol upon admission to the clinical phase of the program and on a yearly basis while participating in clinical experiences. All results must be on file in the program office. If results are positive, the student will be dismissed from the program immediately and referred for appropriate counseling.

Screening for Suspicion

Any student who is suspected of being under the influence of drugs or alcohol who is in a health career program clinical or laboratory setting with a HACC faculty member:

- Will be removed from the setting
- Must submit to immediate substance screening
- Must agree to release results of the screening to the program representative

Any student assigned with a preceptor/clinical instructor (non-HACC faculty), in an observational setting, or engaged in any other program required activity, who is suspected of being under the influence of drugs or alcohol:

- Will be removed from the setting
- Must agree to notification of the program representative as to why the student was removed
- Must submit to immediate substance screening
- Must agree to release the results of the screening to a program representative

Additional Information

- The student has the right to refuse any of these requirements. Refusal will result in dismissal from the program.

- Any student with a positive screen will be dismissed from the program and referred for appropriate counseling.

- Any questions regarding the accuracy of drug or alcohol screening should be directed to the testing agency. HACC cannot be responsible for discrepancies in third party testing.

- All costs associated with drug and alcohol screenings are the responsibility of the student.
Implementation Procedure for Nursing and Health Careers Regulation on Drug/Alcohol Screening

Statement of Philosophy

HACC is dedicated to the safety of patients, students and the community. In order to ensure students engaged in clinical education are drug- and alcohol-free, HACC requires preadmission and annual screening of all health career clinical students. Additionally, HACC requires screening for suspicion if a student at a clinical site exhibits behaviors indicating he/she is under the influence of drugs or alcohol.

Guidelines for preadmission/annual screening:

• Uniformity of screening will be maintained within the program
• A 12-panel drug and alcohol urine screen will be used for annual screenings
• The vendor used will be at the program’s discretion
• Students testing positive will be referred to HACC Counseling Services.

Guidelines for screening for suspicion of use of Drugs or Alcohol while in the Clinical Setting:

When a student is suspected of being under the influence of drugs or alcohol:

• The student will be removed from patient contact immediately.
• An objective second opinion should be obtained.
• A “Reasonable Suspicion Documentation Form” (attached) should be completed and signed by two individuals having supervisory responsibilities for the college prior to the testing. (i.e., clinical instructor, preceptor, director of clinical education, program director, staff technologist, etc.). Note: If a second opinion is not available, continue with procedure.
• The clinical instructor or HACC representative (preceptor) should notify the program director immediately by phone or email. The student will be required, per policy, to submit to drug and alcohol screening.
  o For students suspected of being under the influence of drugs, urine testing will be required.
  o For students suspected of being under the influence of alcohol, either blood or breath testing will be required.
• If screening can be done at the clinical site, the student should be escorted to the screening. If it must be done off-site, arrangements should be made as indicated below.*
• At the completion of the screening, if results are positive or pending, the student must be escorted home, as indicated below.*
• Additionally, the actions taken related to the incident should be documented by the instructor or HACC representative on a Student Conference Form and submitted to the program director for inclusion in the student’s file.
• The instructor or HACC representative should not let the student leave the site or, depending on results, the screening, without escort (*see Transportation of Students below).

*Transportation of Students suspected or documented as under the influence of drugs or alcohol:

The college assumes the responsibility for making transportation arrangements to have students under suspicion transported to a testing facility if onsite testing is unavailable. The college also assumes the responsibility for making arrangements to have the student transported home if test results are positive or are not immediately available. This responsibility falls on the program director or his/her designee. Each program should have a published “chain of command” that should be followed whenever the program director is unavailable to act.

Options for transportation to consider are:

• Notify an individual the student has identified as an emergency contact and ask him/her to transport the student. (Programs should maintain a record of contacts. Permission from the student to contact the individual in the case of an emergency should be obtained at the start of the program). An Emergency Contact Form may be used for this purpose.

• Make arrangements to have the student transported via taxicab (Local taxicab companies can be found listed in the Yellow Pages. Some companies will accept charge cards.)
Health Careers Medical Marijuana Procedure

The Pennsylvania Department of Health is currently implementing the Pennsylvania Medical Marijuana Program, a component of the Medical Marijuana Act (MMA) that was signed as law on April 17, 2016. This program provides access to medical marijuana for patients with serious medical conditions as defined by the Pennsylvania Department of Health.

Currently, the federal government regulates drugs through the Controlled Substances Act, which does not recognize the difference between medical and recreational use of marijuana. Under federal law, marijuana is a Schedule 1 controlled substance, which means that it is considered to have no medical value. Practitioners may not prescribe marijuana for medical use under federal law.

Students entering any Health Careers Program are required to have laboratory screenings for drugs and alcohol upon admission to the clinical phase of the program and on a yearly basis while participating in the clinical experiences. As per current policy, if the results are positive, the student will be dismissed from the program immediately and referred for appropriate counseling.

Students using medical marijuana will not be eligible for clinical placement in any HACC clinical program, due to the current discrepancy between state and federal law regarding Drug Free Work Place Act and the MMA. Businesses who are not in compliance with federal law are at risk for criminal or civil charges; and additionally may find issue with eligibility for federal contracts and grants. Additionally, Pennsylvania’s Medical Marijuana statute specifically provides that an employer does not have to accommodate an individual in a safety sensitive position if that person is under the influence of medical marijuana. Most positions involving direct patient care will be considered safety sensitive positions.

Students should also understand that under current Pennsylvania State Board law, many health career licensing boards require drug screening at the time of application for licensure. Similarly, most health care employers will perform routine drug screening as a condition for employment, as these positions involve direct patient care, and are considered safety sensitive positions. This discrepancy between federal and state law allows our clinical partners to deny student placement for clinical experiences and the State of Pennsylvania to deny licensure.

In order to be transparent with this entire process, we recognize our responsibility to fully inform students of HACC’s procedure regarding the use of medical marijuana. Due to current laws we cannot provide admission to the clinical phase in any of our Health Career Programs and students who have been admitted and are later to be found positive for medical marijuana will be removed.

Student Signature  Date

Revised 11-18-18 me/mjf
I. **Purpose**

Outline the steps to be taken in all cases of criminal findings. It is HACC’s position, in order to protect the safety of the client and the ethics of the HACC health career programs, individuals who have committed certain crimes cannot be placed in the position of caring for older adults, children, and/or working in a health career environment. This procedure applies to all health career programs except the non-credit nurse aide program.

II. **Definitions**

A. **Criminal record**: Any history of conviction of a misdemeanor or felony crime.

B. **Pending charges**: Any criminal charges as yet unresolved by the courts.

C. **Court documents**: Original source documents identifying the outcome of any criminal charge and/or conviction.

D. **Background check**: The process required by HACC for admission into any clinical component of any health career, to include PA State Police Criminal Record Check, PA Child Abuse History Clearance and FBI Background check.

E. **Conviction**: Being convicted, pleading guilty or entering a plea of nolo contendere, or receiving probation without verdict, accelerated rehabilitative disposition (ARD) or receiving any other disposition (excluding acquittal or dismissal) for any criminal offense.

F. **Prohibitive offense list**: List of offenses which indicate a student is not qualified to enter a health careers program.

III. **Procedure**

A. Students must complete this process for all criminal convictions and any pending or new criminal charges upon offer of admission to a health career program.

B. All convictions and pending or new charges must be reported to the director of the health career program immediately upon offer of admission. These include all felony and misdemeanor convictions.

C. Students must have a PA State Police Criminal Record Check, PA Child Abuse History Clearance and FBI Background check once offered admission to the clinical portion of the health career program and yearly in selected programs.

D. A student with any conviction on the attached list (Please note: This is not an all-inclusive list) or pending charge that match exactly on the attached list may not be eligible for entry or continuation in a clinical program. As noted below, HACC will consider for admission, students with a record of other felony or misdemeanor convictions on a case by case basis.

E. Falsification of an application or any information related to a conviction will disqualify a student from admission and/or continuation in any health career program at HACC.

F. Failure to disclose a criminal record or charge will result in dismissal from the program.

G. A decision by HACC to admit a student to a health career program despite criminal convictions does not guarantee that if the student completes the program and obtains the appropriate degree or certificate, the student will be eligible for licensure or credentialing by a governmental
body or will be eligible to work for a particular employer. Licensure and credentialing authorities apply their own standards for evaluating whether criminal convictions are disqualifying, as do employers. HACC accepts no liability in cases where a third party deems criminal convictions sufficiently serious to cause denial of the applicable license or credential, or to refuse employment opportunities. A student with a conviction or convictions is responsible for contacting the appropriate licensure or credentialing board to investigate eligibility and employability prior to entering the non-clinical portion of the health career program.

H. A decision by HACC to admit a student to a health career program despite criminal convictions does not guarantee that a student will be able to participate in experiences at any clinical site. Clinical sites apply their own standards for evaluating whether or not students are eligible to undergo a clinical experience at their facility, and HACC accepts no liability for a student’s rejection by a clinical facility. The health career program will contact the appropriate clinical sites and supply them with information regarding the convictions and the college decision. This will be done in writing and a record of all correspondence and answers will be submitted to the committee chair. The decision reached applies only to the program that the student is entering. If the student wishes to change programs, this process must be repeated and may have a different outcome due to the use of different clinical sites.

I. If a student has or anticipates a criminal charge or conviction, he/she must complete the following in order to participate in a clinical health career program at HACC. The student may not participate in the program until all documentation is received and a decision is reached. Steps in the process of evaluating criminal records:

   I. Complete the required background clearances. (The PA State Police Criminal Record Check, PA Child Abuse History Clearance and FBI Background check).
      a. If the student has only summary offenses or one misdemeanor in the CC3900 series, CC 5902B or CS 13A series, the student must meet with the program director and will be/remain eligible for the program. Go to Section I, IV.
      b. If the student has more than one misdemeanor, any felony convictions, or any pending charges, the student must obtain an original copy of the court records showing how the case was concluded by the court system. No decision will be made without court documentation. Go to section I, II. (Note: Since a decision must be made prior to participating in any health career program, the student should complete this process as efficiently as possible).

   II. Meet with the director of the program bringing the documentation to that meeting.

   III. The director will review these guidelines and the student’s documentation with the student. The conviction will be compared to the HACC Prohibitive List for Participation in a health career program.
      a. If the conviction matches one on the prohibited list, the program director will forward the information to the chair of the Prohibitive Offense Committee for review.
      b. If the offense is similar, but not worded exactly as it appears on the list, the director will consult with the department chair, who in turn may consult with the college attorney, for an interpretation of the conviction. The department chair will include the committee chair in any meetings with the attorney at this stage.
      c. If the conviction or convictions are not on the prohibited offense list or reflective of its intent, HACC will consider the applicant for admission but may reject the applicant because of the conviction(s) in its discretion. Factors to be considered include the nature of the crime, how recently the crime or crimes occurred, time since the end of punishment, age at the time of offense, evidence of rehabilitation, and the number of crimes committed by the applicant, the truthfulness of the applicant and the interests of the College. In this case, the
director will forward all information to the HACC Health Careers Prohibitive Offenses Committee and a decision will be made by a two-thirds majority vote of the members. In the event of a tie, the department chair who oversees the program in which the student wants to enter will be the deciding vote.

1. This committee will consist of a minimum of four health career program directors and two health career directors of clinical education.
2. Members will serve two years.
3. A committee chair will be chosen. The role of the chair will be to ensure the decision is made in a timely manner. The chair will keep a record of the all meetings of the committee, and notify the requested program director of the decision.

IV. In all cases, once the decision has been made, the director of the requested program will meet with the student to discuss the decision and options for the student. The director will then:
   a. document the decision and meeting using the attached notification form
   b. give one copy to the student
   c. place one copy in the student’s confidential file
   d. Forward the original form to the committee chair.

Notification of Eligibility Decision
(for entering/continuing in a clinical component of a health career program at
HACC based on criminal background findings)

The purpose of this document is to provide written documentation for the student with a
criminal record. Name of Student:__________________________  HACCID: __________

Health Career Program:______________ Date:________________

In attendance at the meeting were:___________________________

The subject of the meeting was as follows:

• To provide a review of the findings on the criminal background check required by the HACC health career
  program
• To communicate the decision made related to the student’s eligibility to participate/continue in the clinical
  component of a health career program at HACC

If it is decided the student is qualified to apply/continue in the health career program, the subject of the
meeting was as follows:

• To communicate the possible effect of the convictions on acquisition of licensure/certification following graduation
• To establish it is the student’s responsibility to contact the licensing/credentialing board and employers to
determine the effect of these findings on practice in the health career profession.
• To discuss the licensing/credentialing board requirements in the application process, related to criminal records

The student was notified of the following decision of regarding application/continuation in the health career program:

☐ The student is qualified to apply/continue in the clinical program.***
☐ The student is not qualified to apply/continue in the clinical program due to the

following reason/s: Offense/s:______________________________

Comments:____________________________________________________________________________________

This decision does NOT mean that a student will be able to get a license or a credential in their chosen healthcare
field. HACC has no affiliation with these boards and students must contact those boards directly.

Prohibitive Offense Committee Chair, if applicable:__________________________  Date:___________

Signature of Program Director:__________________________________________  Date:___________

Signature of Student:____________________________________________________  Date:___________

A copy of this form will be given to the student, one will be placed in the student’s confidential file and the original will be placed in the office of
the dean of health careers (send completed forms to RCAUMILLER).

*** This decision applies only to the health career program listed above. If the student chooses to pursue a different program, the process
must be repeated and there may be a different outcome due to clinical site acceptance.

Rev 11/18
External Transfer ADN-RN Students

Students in Good Academic Standing and meeting the expectations for professional standards of conduct as defined in the Health Careers Code of Ethics and the College Policy for Academic Dishonesty may apply to transfer into the HACC Nursing Program if meeting all of the following criteria.

- The transfer institution must be a regionally or nationally accredited institution
- The student must have completed a Foundation of Nursing course without any withdrawals or failing grades.
- The student must have successfully completed clinical nursing courses without any withdrawals or failing grades.
- The student must not have any withdrawals or failures due to failure to meet the professional standards of conduct as defined in the Health Careers Code of Ethics or the College Policy for Academic Dishonesty.
- The student must have a transfer GPA of 2.5 or higher.
- The student must obtain a letter from their transfer institution that confirms the student was in good academic standing and has met the expectations for professional standards of conduct at the time of departure (as defined on the HACC Nursing Good Conduct Transfer Form).
- The student should schedule an appointment with Counseling and Advising to begin the transfer process and to complete the external transfer form. The transfer of credit follows SGP 606.
- The student should contact the Nursing Department Chair following an appointment with Counseling and Advising. The Nursing Department Chair will need the following in order to award nursing credits:
  - The transcript from the transfer institution
  - A course description or syllabus for the nursing courses for which the student is requesting evaluation for transfer credits
  - Grade scale from the transfer institution necessary for passing Nursing specific courses being evaluated for transfer
  - Only credits considered to meet the standard for passing from the transfer institution will be considered for transfer into HACC’s Nursing Program

Students Not in Good Academic Standing: As defined by...

- A student who has failed a previous theoretical nursing course
- A student who has failed a previous clinical nursing course
- A student who was not able to progress due to failing a General Education course required by their transfer institution
- A student with a GPA below 2.5

These students may apply for admission into the HACC Nursing Program by completing the application process.

Students are eligible to apply and will be considered for admission into the Nursing AS program who meet the following criteria:

- Is eligible to enroll in (or has completed) ENGL 101
- Is eligible to enroll in MATH 103 or MATH 202
- Earned a TEAS score of 70 or higher (transfer students from another Nursing program may request to have this requirement waived)
• Is enrolled in or has completed (with a ‘C’ or better) BIOL 121* (Anatomy and Physiology I)
• Has completed a second science course (high school or college) with a ‘C’ or better
• Meets the following academic criteria:
  o Transfer students coming from another Nursing program must not have any withdrawals or failures at the previous educational institution due to failure to meet the professional standards of conduct as outlined in the Health Career Code of Ethics or the College Policy for Academic Dishonesty.
  o Transfer students must possess a GPA of 2.5 or higher. If the student’s GPA at time of transfer is not above 2.5, the student will need to establish a GPA at HACC that is eligible for meeting this criteria.
  o Has met with a nursing advisor (walk in advising does not meet this criteria)
  o Complete the online application indicating they have taken nursing courses in the previous two years.
  o Once the student is accepted, the transcript will be reviewed by the Chair of Nursing and credit awarded. The Nursing Department Chair will need the following in order to award nursing credits:
    ▪ The transcript from the transfer institution
    ▪ A course description or syllabus for the nursing courses for which the student is requesting evaluation for transfer credits
    ▪ Grade scale from the transfer institution necessary for passing Nursing specific courses being evaluated for transfer
    ▪ Only credits considered to meet the standard for passing from the transfer institution will be considered for transfer into HACC’s Nursing Program

The following must be successfully completed once admitted into the nursing program (for all external transfer applicants regardless of status).
  o Validation of clinical skills required for level at which student will be entering.
    o There is a clinical lab fee of $150 required prior to scheduling validation.
    o Students who are unable to demonstrate skill competency after two repeat attempts must enroll in the appropriate course.
    o Failure to keep the scheduled appointment will incur an additional charge of $150 to reschedule validation unless 24 hour notice has been given.
  o Completion of required background checks and drug/alcohol screening.
    Completion of a dosage calculation test required for the level at which the student will be entering. Dosage calculation testing will follow the Nursing Department protocol.
LPN to Associate Degree in Nursing Transitional Track Option

LPNs with an unencumbered license in Pennsylvania can apply to the campus and program of their choice as outlined in the Admission Criteria. Previous HACC RN students, who have successfully graduated from HACC’s PN program and now wish to readmit to the RN program, must follow the Application and Admission cycle deadlines as published as part of the admission criteria for the semester they wish to return. No transitional track student will be accepted after the deadline has passed.

The nursing program admission criteria and application timeline is consistent for all applicants to the program; including students selecting the transitional track option. Transitional track students holding an unencumbered license will receive credit for the following courses: Nursing 140; Nursing 141 and Nursing 144.

Transitional track students will be given the option to receive credit by examination for the following courses: Nursing 150, Nursing 242; Nursing 243 and Nursing 244.

To earn credit by examination, the transitional track student will complete the Assessment Technology Institute (ATI) examination, associated with the course and score at a Level 2 or Level 3. **Only one attempt is allowed per exam.** ATI exams will be arranged through the campus Nursing Director.

Upon earning a grade of Level 2 or higher on the proctored ATI exam, the academic department chair will notify the Registrar’s office to post course credit to the student’s transcript. No entry will be made on the student’s transcript if the exam score is not high enough to award credit.

The credit by examination option must be completed prior to the beginning of the course. If the student does not schedule by the campus imposed deadline, the option to test is no longer available. Once a decision has been made to opt out of testing, the decision is final. Students must check with the Campus Director for testing dates.

Skill validation must be completed prior to the first clinical course (N150 or N151).
ACADEMIC PROGRESSION

AD NURSING PROGRAM

A theory grade of “C” (75%) or above in nursing courses, and an “M” (met) in the clinical component must be earned in order to progress to the next nursing course, and to graduate from the Nursing Program. The student must maintain an overall GPA of 2.0 in order to continue in the program.

Grading Scale for the AD Nursing Program:

- 91 – 100 %  - A
- 83 – 90 %  - B
- 75 – 82 %  - C
- 67 – 74 %  - D
- Below 67%  - F

PRACTICAL NURSING PROGRAM

A theory grade of “C” (70%) or above in nursing courses, and an “M” (met) clinical component must be earned for each nursing clinical course in order to progress to the next nursing course and to graduate from the Practical Nursing Program. Practical Nursing students must attain a grade of “C” or higher in Biology 111, Biology 100 and maintain an overall GPA of 2.0 in order to continue in the program.

Grading Scale for the PN Nursing Program:

- 90 – 100%  - A
- 80 – 89%  - B
- 70 – 79%  - C
- 60 – 69%  - D
- Below 60%  - F

Any unsafe or inconsistent clinical performance by a student can warrant withdrawal from the AD or Practical Nursing program at any time.
COURSE REGISTRATION/FACULTY ADVISORS

1. The name of the faculty advisor is available to the student on the HACC WEB.

2. Faculty advisors will assist in course selection and/or registration for the upcoming semester.

3. Questions regarding progression in the nursing program should be addressed to faculty advisors.
RETENTION

Support services are available for students who need assistance in overcoming academic and personal barriers to success in the College. Students are encouraged to seek out these services by contacting the Student Services Office at your campus.

Nursing students are encouraged to seek out assistance from the appropriate course instructor or faculty member as soon as academic or clinical issues arise. Students may schedule an appointment with the Nursing tutor at their campus.

Students have access to a nursing retention specialist on each campus. Contact information can be found in each course syllabus. The purpose of the retention specialist is to provide students with study skills and test taking strategies. They also serve as the resource person to help students navigate and use their electronic resources to their fullest potential.

LEARNING RESOURCES

Welcome to ATI!
To get started with the resources from Assessment Technologies Institute create an ATI account at www.atitesting.com, click on “Create an account”. Fill out the form as prompted (No need to fill in a student ID). When asked to identify your school, filter down to Harrisburg Area CC and identify the proper campus. When the registration is completed, you will then have access to your ATI student home page. In the future the user name and password you created will allow you to sign into your ATI student account.

Once you are given the product or assessment ID by your instructor, sign into your ATI account, click on the “My eLearning” tab, enter the ID to gain access to more assessments and tutorials. To view an orientation tutorial click on “My eLearning” tab at the top of the home page, and then click on “Tutorials” at the middle of the page. Scroll down, and access “ATI Nursing Getting Started” for a valuable short media clip on ATI.

Don’t forget, you must download “Silverlight” and other (free) tech requirements. Access to free downloads can be found on the landing page of www.atitesting.com.

ATI client support: 1-800-667-7531 – hours are Monday-Friday, 8 a.m. to 8 p.m. Eastern. Join “Assessment Technologies Institute” on Facebook for NCLEX questions of the week.

HACC’s Ten Valuable Steps for Academic and NCLEX Success using Assessment Technologies Institute (ATI) Resources

1. Complete an ATI assessment. See info on how to do this on your student home page under “Orientation Materials” in the document “How to Take a Practice Assessment”.

35
2. Print out the results of this assessment called your “Individual Performance Profile”. See how to do this on your student home page under “Orientation Materials” in the document “How to Access My Results”.

3. Use the "Topics to Review" found on this report to study your nursing content.

4. Remember each "Topic to Review" is content from a test question that you got incorrect.

5. Use either your ATI review modules or your nursing textbooks for information to describe two to three valuable points to remember for each "Topic to Review". Index cards work great for this. Write the topic to review on one side and the two to three valuable points to remember on the other side. Explore "Resources" on your student home page to access your online ATI review modules as well as remediation templates that can also be valuable in focusing your study.

6. Review these valuable points from your topics to review at least five times. Understand you may never see this test question ever again but there is a VERY good chance you will see this topic either on a classroom test, another ATI assessment, or on the NCLEX!!

7. Use your ATI tutorials to further study content. The tutorials available to you are the Skill modules, Pharmacology 3.0, Dosages and Calculations and Nurse Logic and Learning System. Nurse Logic and the Learning System for example can decrease test taking anxiety and improve test taking skills. See how to access the tutorials under “Orientation Materials” on your student home page.

8. Create a focused review online from your assessment to assist with study. See info on how to do this under “Orientation Materials” on your student home page under “How to Access Remediation”. Please also note that ATI’s remediation templates can also be found in the focused review for each topic.

9. Take another ATI assessment as prompted by your instructor. Go back to #2 above and continue the steps.

10. Smile as your chances of doing well in class and on the NCLEX have just increased considerably!
PROBLEM RESOLUTION

Students having difficulty in any aspect of the Nursing Program are expected to follow the steps listed below in their attempt to resolve the problem.

Step 1. Concerns should be discussed with the involved faculty member. In instances when a student perceives a serious misconduct by the faculty member that would not be appropriate to address initially with that person; the student may begin at the second step of this process. The person at the second step may, however, refer the student back to the instructor if appropriate.

Step 2. If the student does not feel the problem was adequately resolved, concerns should be taken to the course faculty coordinator.

Step 3. Unresolved concerns should be directed to the Campus Director of Nursing. Refer to SGP 608 if applicable.
CLASSROOM REQUIREMENTS

1. Students are expected to attend every scheduled class. In accordance with SGP 601, instructors may drop a student from a class with the concurrence of the division/campus administrator when unexcused absences exceed 15% of the total class hours that will take place throughout the semester and when the excessive absences preclude the possibility of the student attaining the stated learning outcomes for the course. This is done by an instructor-initiated Change of Roster Form, consistent with College Policy. Students so withdrawn will receive a grade of "W" in accordance with SGP 601.

2. Students are expected to be considerate of other students in the classroom. Disruptive students may be asked to leave.

3. Children are not permitted in the classroom, lab, or clinical settings.

4. Any student found removing items from faculty mailboxes will be reviewed under the nursing program academic dishonesty policy.

5. The personal use of cell phones is prohibited in both class and clinical.

6. Any device that allows for video/audio/image recording is not permitted in nursing courses. Any student found utilizing such devices will be subject to the College Academic Dishonesty policy. The nursing department restricts audio taping of lectures to protect patient privacy (HIPAA).
Test Policy

Students may miss only **ONE** scheduled/unscheduled test per semester, by notifying the faculty member administering the test. Notification must be done **before the start of the test** by phone, phone mail or e-mail. *If the student does not notify the faculty member administering the test, he/she will receive a “0” (zero) for the test. On the day the student returns to class, he/she MUST see the instructor concerning the missed test.* The student must be prepared to complete the test **on the next class day**, or the day the student returns to class. If subsequent tests are missed, a “0” (zero) will be given. In the event the final exam is missed due to extenuating circumstances, it must be completed on the next business day.

The make-up test may be given in the College Testing Center, and may differ from the original test. Arrangements will be made by the faculty member after speaking with the student. Bring HACC photo ID to the Testing Center.

- No student will be granted permission to leave the classroom during a test.
- Once the test has been submitted by the student to the faculty member, the student will not be permitted to make any changes to the test.
- The answers placed on the answer sheet represent the student’s answers. It is the responsibility of the student to complete the answer sheet correctly. Blanks or transfer errors are the student’s responsibility. The grade will reflect only the answer sheet. Grades will not be changed. Scantron machine errors (stray marks, improper erasures), when brought to the attention of the faculty, will be reviewed by the faculty and adjusted if appropriate. If dosage calculation questions are asked on the test, the answers to the questions must be circled.
- No hats or hoods may be worn during a test.
- The test area must be clear of all belongings including water bottles, backpacks, handbags, electronic devices including watches and cell phones (which must be turned off). Students will place all belongings at the designated area(s) prior to ALL EXAMS AND EXAM REVIEWS.
- In fairness to students with alternate testing locations, the proctor will NOT answer any questions during the examination. Students may not raise their hands or walk up to the proctor to ask any questions unless there is a mis-numbering of the exam or a medical emergency.
- Reproduction or removal of any test item during the test or exam review is **PROHIBITED** and is considered Academic Dishonesty.
- Time limits will be strictly observed. Students who enter the classroom after the start of the exam will not be granted extra time to complete their exam.
Students enrolled in the first semester in the PN program (N 100), and the first (140 level courses) and second (150 level courses) semesters in the AD nursing program, may request the use of an English Language Thesaurus or English Language Translation Thesaurus in course exams. In order to do so the student must supply the course coordinator with an English Language Thesaurus or English Language Translation Thesaurus and a “Thesaurus Request Form” one week prior to any exam in which the student wishes to use a thesaurus. Approval of the submitted thesaurus for use on exam day is at the sole discretion of the course coordinator.

The criterion for approval includes the following: 1) the thesaurus must be free of any markings or notes added by the student, 2) the thesaurus must include the student’s name, and 3) the thesaurus may not have a dictionary component.

The approved thesaurus will remain in the course coordinator’s possession until the exam. The use of this resource is solely limited to support the student’s understanding of common English terms and no additional time will be allotted for exams.

DOSAGE CALCULATION POLICY

The faculty is committed to excellence in nursing education. The faculty believes that critical thinking skills are one of the integral parts of nursing education and practice. Critical thinking in nursing is purposeful outcome, and is a complex developmental process. It includes safely implementing a plan of care and evaluating the effectiveness of that action. The nursing faculty believe that safe and effective care, clinical competence and ethical practice are expected as part of the ideals of the nursing profession.

Dosage calculation is a critical skill in nursing which requires 100% accuracy to ensure client safety.* This skill must be mastered and that mastery requires continued vigilance in professional nursing practice. In order to promote life-long accuracy and safety in dosage calculation, nursing students at HACC are required to demonstrate mastery of mathematics and dosage calculation upon entry and throughout the duration of the nursing programs.

* Medication errors are estimated to account for at least 7,000 deaths in the United States alone every year. (Institute of Medicine, 2009) Over 770,000 patients are estimated to be injured because of medication errors every year. (Agency for Health Research and Quality, 2007) One 5-year study showed that the most common types of medication errors were a wrong dose, a wrong drug or a wrong route of administration. (Phillips J, Beam S, Brinker A, Holquist C, Honig P, Lee LY, Pamer C. Retrospective analysis of mortalities associated with medication errors. Am J Health Syst Pharm. Oct 2001. 58(19);1835-41).
PRACTICAL NURSING REQUIREMENTS

NURSING 100

Guidelines for Math Pre-Test

- Calculators are permitted, but ALL setup of formulas, must be shown for the test to be graded. All students with less than a 70% on the math calculation test are required to go to the Learning Center/Student Services for math remediation. There will be a pre-determined deadline for completion of the remediation. Failure to meet the deadline will result in an Academic Deficiency.
- Students who receive a 70% or higher must identify areas of need and remediate on their own, with a faculty member, and/or go to the Learning Center/Student Services.
- Students must take their math test, their Dosage Calculations text, and a referral slip each time they go to the Learning Center. The faculty referral slip must be signed at the Learning Center and returned to the Coordinator/Faculty advisor.
- Students must sign in and out at the Learning Center/Student Services.
- The math calculation test must remain in your clinical folder the entire semester.

During this semester dosage calculation will be presented in the classroom with additional practice taking place during assigned clinical post-conferences. At the end of Nursing 100 (date to be announced), all students will take a 10-point dosage calculation test. This test will include oral dosages, parenteral dosages, and IV drip rates. The test will be graded immediately, and incorrect problems will be circled. The student will have one opportunity to correct these problems within the one-hour time frame allotted for the entire test. Calculators are permitted, but ALL setup of formulas must be shown for the test to be graded. If 100% is not achieved, the student will be strongly encouraged to seek further remediation in the Learning Center located on campus and/or make an appointment with a faculty member for additional instruction.
HARRISBURG AREA COMMUNITY COLLEGE
PN NURSING PROGRAM
DOSAGE CALCULATION REQUIREMENTS

Nursing 102 Entrance Dosage Test

Requirement: All students in Nursing 101 must verify 100% competency in dosage calculation skills by taking a ten-point dosage test. Competency requirement is 100%.

Test Preparation:
1. Utilize the Formula Method

   Formula Method:
   \[ \text{D (desire)} \times \text{Q (Quantity)} = \text{dose} \]
   \[ \text{H (have)} \]
   \[ \frac{\text{V (volume)}}{\text{C (drop factor calibration)}} = \text{R (rate of flow)} \]
   \[ \text{T (time in min)} \]
   \[ \frac{\text{mL/h}}{\text{= gtt./min.}} \]
   Drop factor constant

2. Topics included on the test are oral dosages, parenteral dosages, IV (drops/min and mL/hour), and reconstitution.
3. Conversions must be memorized.
4. Consider supplemental resources such as:
   - ATI: Dosage Calculation 2.0 Desired Over Have
   - Practice tests in your Dosage Calculations textbook
5. Seek help from nursing faculty for any questions as soon as possible.

Procedure:
1. The first test will be given early in Nursing 101.
2. The student will have one hour to complete the test including one chance for corrections.
3. If the student does not attain 100% on the initial N102 Entrance Dosage Test, he/she will have two more opportunities, with a one hour allotment and no chance for corrections, to obtain 100% competency.
4. Calculators are permitted, but ALL setup of formulas must be shown for the test to be graded.
5. If the student does not attain 100% after the third test, the student may complete N101, but will not be permitted to progress to N102.
N141 Dosage Test

Requirement: All students in Nursing 141 must verify 100% competency in basic math/simple dosage by taking a ten-point dosage test. The student will have one hour to complete the test with one chance for corrections on the first attempt.

Calculators are permitted, but, ALL setup of formulas must be shown for the test to be graded.

Competency requirement is 100%.

Test Preparation:

1. Utilize the formula method.
   
   Formula Method:
   
   \[ D \text{ (desire)} \times Q \text{ (Quantity)} = \text{dose} \]
   
   \[ H \text{ (have)} \]

2. Topics included on the test are basic math which includes multiplication and division of decimals, and oral dosages.

3. The student will be able to utilize a conversion chart when calculating the problems – this conversion chart will be attached to the 10 point dosage test.

4. Consider supplemental resources such as:
   
   ATI: Dosage Calculation 2.0 Desired Over Have

5. Seek help from nursing faculty for any questions as soon as possible.

Procedure:

1. The Dosage test will be given during the first week of N141.

2. The student will have one hour to complete the test and one chance for corrections within the one hour allotment.

3. If the student does not achieve 100% on the N141 dosage test a remediation packet will be given.
   
   a. The remediation packet must be completed and submitted to a N141 faculty member before a test retake can be scheduled.

4. After submission of the remediation packet, the student can retest twice **without** a chance for corrections to obtain 100% competency on the dosage test.
   
   a. The test must be successfully completed by receiving 100% by the midpoint of the course.

   b. **Calculators are permitted, but ALL set-ups of formulas must be shown for the test to be graded.**

5. If the student does not obtain 100% competency by the third dosage test, the student will be withdrawn from any course with a clinical component.
HARRISBURG AREA COMMUNITY COLLEGE
AD NURSING PROGRAM
DOSAGE CALCULATION REQUIREMENTS

Nursing 151 Dosage Test

Requirement: All students in Nursing 151 must verify 100% competency in dosage calculation skills by taking a ten-point dosage test. The student will have one hour to complete the test including one chance for corrections on the first attempt.

Calculators are permitted, but, ALL setup of formulas must be shown for the test to be graded.

Competency requirement is 100%.

Test Preparation:
1. Utilize the formula method

   Formula Method:
   \[
   \frac{D \text{ (desire)}}{H \text{ (have)}} \times Q \text{ (Quantity)} = \text{dose}
   \]

2. Topics included on the test are oral dosages, IM/subcut dosages, reconstitution, and IV (drops/min and mL/hour), as well as all previously tested material.
3. Conversions must be memorized.
4. Consider supplemental resources such as:
   ATI: Dosage Calculation 2.0 Desired Over Have
5. Seek help from nursing faculty for any questions as soon as possible.

Procedure:
1. Register for the test by the deadline, according to instructions.
2. The student will have one hour to complete the test including one chance for corrections on the first attempt.
3. If the student does not achieve 100% on the N151 dosage test, he/she will have 2 more chances, with a one hour allotment, without a chance for corrections, to obtain 100% competency.
   a. Calculators are permitted, but, ALL set-ups of formulas, must be shown for the test to be graded.
   b. Faculty will schedule the test(s)
4. If the student does not obtain 100% competency by mid-course (third test), this will be considered a clinical failure, and will be noted as a “not met” in the Clinical Performance Evaluation. The student will be withdrawn from any course with a clinical component.

N151 Dosage policy 2018
**HARRISBURG AREA COMMUNITY COLLEGE**
**AD NURSING PROGRAM**
**DOSAGE CALCULATION REQUIREMENTS**

**Nursing 250 Dosage Test**

**Requirement:** All students in Nursing 250 must verify 100% competency in dosage calculation skills by taking a five-point dosage test. The student will have 30 minutes to complete the test including one chance for corrections on the first attempt.

Calculators are permitted, but, ALL setup of formulas must be shown for the test to be graded.

Competency requirement is 100%.

**Test Preparation:**
1. Utilize the formula method

   **Formula Method:**
   \[
   D \text{ (desire)} \times Q \text{ (Quantity)} = \text{dose}
   \]
   \[
   H \text{ (have)}
   \]

2. Topics included on the test are IV drips (Lasix, Heparin, etc.), reconstitution, and pediatric dosage calculations, as well as all dosage material from previous semesters.
3. Conversions must be memorized.
4. Consider supplemental texts such as:
   - Dosage Calculations Made Easy
   - Davis’ Basic Math Review for Nurses
5. Seek help from nursing faculty for any questions as soon as possible.

**Procedure:**
1. Register for the test by the deadline, according to instructions.
2. The student will have 30 minutes to complete the test including one chance for corrections on the first attempt.
3. If the student does not achieve 100% on the N250 dosage test, he/she will have 2 more chances, with a 30 minute allotment, **without** a chance for corrections, to obtain 100% competency.
   a. **Calculators are permitted, but, ALL set-up of formulas must be shown for the test to be graded.**
   b. Faculty will schedule the test(s).
4. If the student does not obtain 100% competency by mid-course (third test), this will be considered a clinical failure, and will be noted as a “not met” in the Clinical Performance Evaluation. The student will be withdrawn from any course(s) with a clinical component.

N251 dosage policy 2018
NURSING SIMULATION LABORATORY PROCEDURES

The Nursing Simulation Laboratory is a critical component of learning and mastering Nursing Skills. The following policy applies to the use of the Simulation Laboratory.

1. Consult course materials for the due date for each skill. The student is responsible to schedule a return demonstration far enough in advance to allow sufficient time to successfully pass the skill before the due date. Failure to plan ahead may result in lack of availability of return demonstration time. Time management on the student’s part is critical for successful completion of the skill.

2. The student is responsible to keep a record of lab appointments and arrive on time. If unable to keep an appointment in the simulation lab, the student must notify the laboratory as follows:
   a. Harrisburg: email the lab before 7:45 a.m. on the morning of the appointment to cancel at: calllab@hacc.edu. The email address is only for cancellations.
   b. Lancaster lab- leave a message at 717-358-2880 by 7:45 a.m. the day of the appointment.
   c. Gettysburg lab- leave a message at 717-339-3564 by 7:45 a.m. the day of the appointment.
   d. York lab – leave a message at 717-801-3234. Open 4:30p-9:30p M-Th
      (York students must call the lab to confirm availability)

Laboratory appointment times will not be confirmed by phone. Students are not permitted in the laboratory when they are scheduled to be in class or clinical.

A no show is any appointment that is not kept or is cancelled after the deadline listed in #2 above for each campus. Students may have one “no show” without penalty per semester.

Any student who has subsequent no shows will be issued an academic deficiency for each occurrence.
CLINICAL EXPECTATIONS

Expectations include but are not limited to the following:

1. Faculty, staff and clients are to be addressed as "Dr.," "Professor," "Mr.,” "Mrs.,” or "Miss," along with their surname unless otherwise requested by the individual.

2. Students should always confine conversation to a therapeutic nature as much as possible when in the presence of patients or staff at the participating hospitals or facilities. Discussions of a personal nature should be limited to areas of the hospital or facility where the student can be sure that staff or patients cannot be annoyed by the conversation.

3. Appropriate and professional language is respectful and must be used at all times. Appropriate language does not include profanity, slang terminology or expletives.

4. Gum chewing in the clinical setting is NOT professional and will not be tolerated.

5. Student uniforms and accessories must be clean, neat, and free of offensive odors. A professional appearance must be maintained at all times.

6. Post-Conference is a part of the clinical day and a professional appearance is expected.

7. Personal use of cell phones is prohibited during the clinical experience.

8. Students must adhere to agency policies regarding all facility ID's, smoking (includes all tobacco products and the electronic cigarette), parking, and any other agency specific policies.

9. All students must maintain all clinical ID’s during the nursing program. If required by the institution, clinical ID’s must be returned to the nursing program Director/Assistant Director at the time of withdrawal or graduation.

10. Students must notify the instructor and primary nurse when leaving the clinical unit. Failure to do so may result in expulsion from the nursing program.

11. Students may not visit or call the clinical unit for any reason. Students may only call the clinical unit to report absence or lateness.

12. Students may perform a procedure in the clinical area only with instructor supervision.
13. Students may not take pictures of any kind while in the clinical setting. Students may not be in any pictures taken by other students, staff, patients or family members while in the clinical setting.

Your behavior in the clinical setting is a direct reflection on the nursing program at HACC. Students are present in the clinical setting as guests of the agency for the purpose of education. Program policy supersedes any clinical site policy. Discrepancies between HACC requirements and Agency policies must be discussed with the instructor immediately.
DRESS CODE AND UNIFORM REQUIREMENTS

Students assigned to the clinical experience must be in complete uniform. Students are expected to be meticulous regarding personal hygiene. Uniforms must be clean and pressed; shoes and laces must be clean. The HACC nursing uniform may only be worn when engaged in the role of a HACC nursing student.

A. Complete Uniform
1. The uniform must be worn with appropriate undergarments
2. A mandatory second level stripe will be required on the left upper sleeve of the uniform.
3. Clean, neat, non-permeable, predominantly white, navy or black shoes.
4. A Ciel blue lab coat (warm-up jacket) is required in the nursing lab, on simulation days and other clinical experiences.
5. Students may wear a shirt under their uniform. Acceptable colors are white, ceil blue, navy or black.

B. Required Accessory Items
1. Standard name pin (purchased from uniform company)
2. Bandage scissors (hemostat--Second Level AD students)
3. Black ballpoint pen
4. Watch capable of counting seconds
5. Stethoscope
6. Electronic hand held device (smart phone, tablet, etc.)
7. HACC photo ID with HACC plastic holder
8. All institution specific ID’s as required

C. Hair is to be clean, neat, and tied back away from the face and off the collar. Hair style and color need to be conservative. Facial hair must be clean and well-groomed.

D. Jewelry is limited to a wedding band, and a single stud-like earring per earlobe. Gauged earrings must be flesh-colored. Facial and tongue jewelry are NOT PERMITTED.

E. Tattoos may NOT be visible

F. Fingernails are to be short, well-trimmed and clean. No polish or artificial nails permitted.

G. Excessive make-up is to be avoided.

H. The student will be free of fragrances and offensive odors such as perfume, cologne, cigarette or other smoke, body odor.

I. Gum chewing is not permitted.

Students not complying with Dress Code and Uniform requirements while in the clinical setting will be sent home by the faculty member, unless the issue can be remedied immediately. If sent home, this day will be considered an unexcused absence, resulting in an academic deficiency for unexcused absence, and a “not met” in the Clinical Evaluation.
HEALTH POLICY RELATED TO ILLNESS OR INJURY

In the event a student experiences an acute or chronic illness, or injury the student must inform the course Coordinator as well as their clinical instructor(s). The student must submit a statement from the healthcare provider stating the student is able to meet the Essential Qualifications for Health Careers Programs Nursing and Practical Nursing (starting on page 14 of the handbook) and may continue to participate in clinical nursing experiences.

It is the student’s responsibility to report any change of condition to the Coordinator and faculty. In the event the student misses clinical days, written approval from a licensed provider must be submitted to the Coordinator prior to returning to the clinical experience.

Faculty will make reasonable effort to allow make-up of missed clinical experiences; however, the student must understand that extended absences may result in the inability of the student to meet clinical objectives.

Students who withdraw from nursing courses for documented health problems are permitted to apply as per the readmission procedure.

Updated 8/2018
In the event a student becomes pregnant, she must submit a statement from her obstetrician or midwife, which will be submitted to the nursing office on the respective campus.

The obstetrician or midwife must state that she may continue to participate in clinical nursing experiences. Recommended Center for Disease Control (CDC) guidelines related to avoidance of exposure to infectious diseases by pregnant women will be followed.

After delivery, written approval must be given prior to returning to clinical experience. Faculty will make reasonable efforts to allow make-up of missed clinical experiences; however, the student must recognize that extended absences may result in the inability to meet clinical objectives.

Students who withdraw from courses for documented health problems – including pregnancy – are allowed readmission to the course by submitting an Application for Readmission. Forms are available in the campus nursing office.

I have read the above policy and I will submit the required statement from my physician.

(Name please print)

(Signature)
All injuries, blood and body fluid exposures, or exposure to a potentially infection TB patient for whom infection control procedures have not been taken must be reported to your instructor, preceptor or supervisor immediately. He/she will follow the appropriate guidelines to assist you in receiving immediate medical attention. He/she will ask you about the incident and initiate the appropriate incident report and treatment processes. Be as specific as possible when giving details around the incident including the location and/or identification of the source or source person.

AN INCIDENT REPORT MUST BE FILED FOR EVERY INJURY OR ACCIDENTAL EXPOSURE.

In case of accidental exposure to blood or body fluids, or exposure to TB, students are expected to follow the procedure outlined after the incident report.

All forms will be retained on a secure drive by the Coordinator of Health Careers.
Health & Public Service Department
Post Exposure Responsibility Form

Student Name: __________________Student HACC ID: ___________ Date of Incident________

This form must be completed by the student within 24 hours after the exposure and submitted to the program director within 48 hours after exposure.

ALL STUDENTS MUST be seen in the emergency department/employee health department within 2 hours for blood and body fluids exposure or TB exposure. Failure to comply will result in dismissal from program. It is the student’s responsibility to obtain medical treatment and follow-up after exposure to blood or body fluids or tuberculosis. Treatment following exposure includes initial screening; counseling concerning risk, health, and relationships; and follow up testing.

Initial all statements which are correct.

_____ I have been seen in the emergency department/employee health department or by my personal health care provider within 2 hours after a blood and body fluid exposure or within 24 hours of a TB exposure.

_____ My exposure was to blood or body fluids and post exposure prophylaxis (PEP) measures were taken as appropriate (PEP measures may include blood work for baseline HIV, Hepatitis B and C; administration of immunizing agents; administration of antiretroviral treatment; and administration of immunoglobulin.)

_____ My exposure was to TB, and I previously have had no history of a positive PPD test, a PPD test was placed and I was provided counseling related to signs and symptoms of TB.

_____ My exposure was to TB, and I have a previously known positive PPD test, a PPD test was not placed but I was provided counseling related to signs and symptoms of TB and recommended follow up measures.

_____ I plan to fully participate in all follow-up medical care as recommended by the emergency department/employee health department or my personal health care provider.

_____ I have had a blood or body fluid exposure and I do not plan to participate in follow-up care as recommended.

_____ I have had a TB exposure and I do not plan to participate in follow-up care as recommended. I understand my decision to not participate in continued monitoring for the presence of TB will require that I withdraw from the program.

The student must initial each statement below. The student’s initials indicate understanding of each statement.

_____ I realize that I am responsible for any health care expenses related to this situation.

_____ I realize that I have the right to refuse to be tested for exposure/infection.

Accidental Exposure to Blood or Body Fluids

**IMMEDIATELY after you have been exposed** to blood or body fluid (i.e. needle stick, splash, and exposed mucosa) **WASH THE EXPOSED AREA WITH SOAP AND WATER OR FLUSH EYES WITH AT LEAST ONE (1) LITER OF WATER OR NORMAL SALINE SOLUTION.**

Follow the appropriate procedure based upon where the exposure occurred:

<table>

Health Career Code of Ethics

In order to promote excellence in patient care, the HACC Health Career student, while in their program, or in their clinical uniform, are to:

- Treat patients with respect for the dignity, rights, and value of each individual.
- Provide nondiscriminatory and equitable treatment for all patients.
- Promote and strive to protect the health, safety, and rights of each patient.
- Maintain confidentiality of patient information following privacy regulations required by law.
- Not disclose or share information associated with their health career program about or relating to any patient, person, clinical facility, or clinical experience outside of the sanctioned educational context of the classroom or online course environment with oversight of an instructor. This includes communication in any format including verbal, written, and digital (includes but is not limited to text, email, photographs, and social media).
- Perform procedures or functions within his/her level of education in the profession.
- Refuse to participate in any illegal, unethical, or incompetent acts.
- Disclose any illegal, unethical, or incompetent acts of others to the proper authority.
- Avoid any conduct that creates a conflict of interest.
- Demonstrate professional behavior that reflects integrity and a positive image of the profession and the college.
- Follow all principles of ethical and professional behavior, as identified in the code of ethics of his/her chosen health career.

Students shall be denied admission to a program for breaches in any of the above code of ethics. Students who are in a clinical program and breach the code of ethics will be dismissed from the program and denied access to any other health career program at HACC.
STANDARDS OF STUDENT CONDUCT

All students admitted to the Nursing Program are expected to exhibit standards of student conduct, which are acceptable to the total community. The standards listed below have been established to reflect the position of the Nursing Program as well as the College.

While enrolled in the HACC Nursing Program, it is expected that the student will:

1. Not use or consume illegal substances. The College reserves the right to refer students to a physician in the event of a violation or a suspected violation of this provision. The student is responsible for all of the costs of this referral.

2. Comply with the College Student Rights and Responsibilities as presented in the College Student Handbook.

3. Conduct himself/herself on or off campus in a manner consistent with the standards of the academic and professional community. This conduct extends to respect for faculty, and respect for the rights of other students to have private discussions with the faculty.

4. Any student with criminal charges must immediately disclose such charges to the Director of Nursing Programs on his/her campus. Failure to immediately disclose any criminal charge will result in dismissal from the Nursing Program. Any student with criminal charges may not participate in clinical practice until the charges are resolved. Charges will be considered on an individual basis and may result in the student’s dismissal from the program.

Violations of the Standards of Student Conduct may lead to the discipline of a student up to and including expulsion from the program.
CONFIDENTIALITY

Students are exposed to much information by virtue of their role as students in a clinical setting. Each student is expected to observe and follow all Health Insurance Portability and Accountability Act (HIPAA) Privacy Rule AT ALL TIMES.

Any breach of confidentiality on the part of a student will result in disciplinary action. Depending upon the nature and severity of the breach of confidentiality, the nursing faculty may discipline a student including removal of the student from the nursing course and possible expulsion from the program. Breeches include, but are not limited to: unauthorized possession, use, copying or disclosure of a patient record; disclosure of patient, staff, or faculty information in unauthorized clinical areas or outside of the clinical or teaching area, including internet social networking sites; contacting a patient at their residence either by visit or telephone unless authorized as part of the clinical experience.

Removal of any items from the clinical setting with any patient/client identifying information will be grounds for withdrawal from the nursing program. Any papers that are printed on the clinical unit must be discarded in the appropriate receptacle before leaving the unit.

Students have access to clients’ records ONLY during designated clinical hours, or at the discretion of the instructor.
ACADEMIC DISHONESTY

The nursing faculty, along with the nursing community, believes that an essential nursing value is honesty. Students participating in HACC’s nursing program must embrace this core value if the integrity of the profession is to be upheld (AACN, Essentials of college and university education for professional nursing, 1986; ANA Code of Ethics, 2001; Pennsylvania Code, Title 49. Professional and Vocational Standards, August 2005).

Depending upon the nature and severity of the dishonest act, the nursing faculty may discipline a student including removal of the student from the nursing course and possible expulsion from the program. This practice follows the college guidelines for academic dishonesty.

Acts of dishonesty include, but are not limited to the following: falsifying or knowingly making incorrect entries into the patient’s record or related documents (PA Code, Title 49, p. 12-13); copying other student’s written assignments (assessments, concept maps, clinical performance evaluation, etc.), cheating on examinations and quizzes, and making untrue statements to a faculty member or administrator.

College Policy #594

Academic honesty is one of the fundamental principles upon which the College was founded and upon which it must operate in order to continue to perform its most important function. Students are expected to be honest in all of their academic endeavors. The College views academic dishonesty as a serious breach of conduct. Depending upon the nature and severity of the dishonest act, the faculty and the College may discipline a student for verifiable acts of dishonesty occurring in or out of the classroom. This practice shall be implemented according to regulations approved by the President. This practice follows the guidelines for academic dishonesty. Please refer to the College Student Handbook.
HARASSMENT POLICY
(TO INCLUDE VIOLENCE AND SEXUAL HARASSMENT)

PURPOSE

The Nursing Programs of HACC are committed to the education of nursing students in a safe and conscientious manner consistent with the regulations of the Pennsylvania State Board of Nursing and of the College. In order to provide an environment which is conducive to learning, the nursing faculty will not tolerate any form of harassment, including sexual harassment or violence. This is in compliance with the Harassment Policy (as defined in SGP #825 found in the College Student Handbook) and will not be tolerated at any time in either classroom or clinical settings.

Harassment, sexual misconduct or violence that occurs outside of these settings, even away from the HACC campus, may be grounds to withdraw a student from the Nursing Program. Any member of the College community who believes he/she is being subjected to harassment shall report the situation to the appropriate authority as defined in the SGP #825 found in the College Student Handbook.

PRACTICE

The term "zero tolerance" means that any violation of this policy will result in severe academic deficiency, including possible withdrawal from the Nursing Program. Harassment is described in SGP #825, which is in the College Student Handbook. Even comments which are intended to be joking in nature may violate this requirement. It is not acceptable to joke about harassment or violent behavior. The procedures for dealing with alleged violations of this requirement will be carried out in accordance with SGP #505.
CLIENT SAFETY

NEWBORN/PEDIATRIC SAFETY

If at any time a student has a concern about patient safety, the student must contact the clinical instructor immediately.

Crib rails must be in the full “UP” position for all newborns/infants and toddlers who are left unattended. **There are no exceptions.** Students may **NEVER** turn away from a newborn/infant or toddler without one hand being placed on the child if the rails are in the “DOWN” position. Infants and toddlers are **NEVER** to be left unattended in a high chair - even with a waist strap in place.

Newborns/Infants may never be left in an area where they are unattended by students, staff and/or family caregiver. **There are no exceptions.** Newborns/infants must be placed on back or side in bassinet. Newborns must be transported in bassinet. Newborns and young infants must be held in the nursing student’s lap for feeding. Students must check ID bands before returning newborn to “parent.”

**This policy includes ALL age appropriate crib safety measures.**

**Adult Safety**

Safety of adult clients must be maintained at all times by providing measures to create a safe physical environment. Aspects of critical thinking and nursing process must be utilized to assess a client's risk for unsafe behavior and implement strategies to ensure client safety. This will include, but not be limited to use of side rails as appropriate, reducing physical hazards, and consideration for risks related to developmental stage, physiological changes related to aging, and environmental concerns.

**If a client is placed at risk for physical injury, it may result in a clinical failure for the student.**
UNSAFE BEHAVIOR OF STUDENTS PARTICIPATING IN CLINICAL/CLASSROOM SETTINGS

PURPOSE

The Nursing Program at HACC is committed to the education of nursing students in a safe and conscientious manner consistent with the regulations of the Pennsylvania State Board of Nursing and of the College. Patient safety and well-being should be enhanced by the presence of the Nursing Program students.

Each nursing student must be able to complete the classroom and clinical components of the program described in the Syllabus and Clinical Evaluation. A student’s success in doing so can be affected by emotional, psychological or physical problems that can interfere with their ability to function safely in the classroom or in a clinical setting.

PROCESS

The Nursing Program actively addresses any unsafe behavior in a clinical/classroom setting.

PROCEDURE

Students and faculty may identify and report unsafe behaviors.

Students identified as exhibiting unsafe behavior will be referred to the Course Coordinator or the Campus Nursing Director.

In cases where representatives of HACC have reasonable suspicion of drug/substance use, HACC reserves the right to require drug testing at the student's expense as a condition of remaining in the program. Refer to Drug Screening in this handbook.
REMEDIATING AN UNSAFE PRACTICE INCIDENT

1. The student may receive a remediation prescription from the instructor for an unsafe behavior in the clinical setting.

2. The student will submit the completed Remediation Prescription to the course faculty within the time frame outlined on the form.

3. All “not met” objectives must be met satisfactorily in order to pass each nursing course and progress in the program, as described in the Clinical Performance Evaluation. The student must satisfactorily re-perform this behavior in the clinical setting to amend the clinical objective to a “met” objective in the Clinical Performance Evaluation.

4. Some unsafe behaviors may result in immediate clinical failure in the nursing course.
NURSING LEARNING LABORATORY EDUCATIONAL PRESCRIPTION

The student may receive a Nursing Learning Laboratory Educational Prescription from the instructor to go to the Nursing Lab to practice skills evaluated as “not met” in the clinical setting. Students will need to demonstrate competency in the specific skill to have the prescription signed by the nursing laboratory faculty. The skills in the prescription must be satisfactory/MET by the date outlined on the prescription by the student or the student will receive an Academic Deficiency.

Failure to successfully complete the skill within the timeframe outlined will result in an Academic Deficiency.
ACADEMIC DEFICIENCY

Academic Deficiencies are serious infractions of Clinical requirements. The following will be considered reasons for Academic Deficiency:

1. Failure to arrive for a scheduled clinical/lab experience at a designated time will result in an Academic Deficiency. Arrival more than 30 minutes late will require a clinical make-up day.
2. Failure to complete entire clinical experience as scheduled. Early departure from clinical due to an illness or emergency will NOT result in an Academic Deficiency.
   Leaving more than 30 minutes early will necessitate a make-up day.
3. Failure to notify the clinical area of absence, ½ hour prior to the clinical starting time.
4. Failure to comply with printed clinical requirements.
5. Failure to submit the clinical assignments
6. Failure to adhere to laboratory module completion deadlines.
7. Unexcused absence from a clinical experience.

Each occurrence will result in a warning notification being given to the student. The initial notification of the academic deficiency may be done verbally, in writing, or electronically. The Academic Deficiency form will be placed in the student’s file and a copy given to the student. Only one academic deficiency can occur on the same day.

For the practical nursing students, the occurrence of three of these incidences will result in a “not met” clinical performance for the course and subsequent withdrawal from the Nursing program.

For the associate degree students, the occurrence of two academic deficiencies per each clinical or lab course will result in a “not met” clinical performance for the course and subsequent withdrawal from the course. The student will be withdrawn from the current clinical or lab course upon accruing a second academic deficiency. The student may continue to complete any other courses that they are currently in. The reasons for receiving an academic deficiency are outlined in the nursing student handbook on the next page.

Rev Dec 2018
HACC NURSING PROGRAMS

ACADEMIC DEFICIENCY

Date: ________________________________

Student Name: ___________________________

You have obtained an academic deficiency for:

_____ 1. Failure to arrive for a scheduled clinical/lab experience at designated time.

_____ 2. Failure to complete entire clinical experience as scheduled.

_____ 3. Failure to notify the clinical area of absence 1/2 hour prior to the clinical starting time.

_____ 4. Failure to comply with printed clinical requirements.

_____ 5. Failure to submit required clinical assignments.

_____ 6. Failure to adhere to laboratory module completion deadlines.

_____ 7. Unexcused absence from a clinical experience.

RN PROGRAM: The occurrence of two academic deficiencies in any clinical or lab course will result in immediate withdrawal from the course upon receipt of the second academic deficiency.

PN PROGRAM ONLY: Please be advised that the occurrence of any three (3) academic deficiencies this semester will result in immediate withdrawal from the practical nursing program.

Faculty Name: ________________________

Faculty Signature: __________________________ Date: ______________________________

Comment by faculty issuing academic deficiency:

______________________________________________________________________________

______________________________________________________________________________

Reminder: Document in the student's Clinical Performance Evaluation Tool.

APPEAL OF ACADEMIC DECISIONS

In the event a student contends an academic decision has been made unfairly, arbitrarily, or capriciously, or on the basis of bias or prejudice, they have the right to appeal this decision. SGP 608, Appeal of Academic Decisions, can be obtained from a Campus Nursing Director or Campus Dean.

In the event a student is in the process of appealing an academic decision, they may progress to the next course, attending class, but not clinical.
GENERAL PROCEDURE
In the event the college closes due to a snowstorm or other inclement weather, all health career students who are scheduled for class or a clinical experience that day will not report to class or clinical.

In the event a campus closes due to a snowstorm or other inclement weather, all health career students who are scheduled for class or a clinical experience originating (section campus) at that campus that day will not report to class or clinical.

In the event of inclement weather and the college remains open, all students are expected to make every reasonable effort to attend class and clinical. However, *undue risk when traveling is to be avoided.*

Students who believe it is not safe to travel should notify the clinical area/affiliate and/or the director of clinical education/clinical instructor of their absence per the course syllabus and/or student clinical handbook. Students are responsible for making up missed assignments or the clinical day per the course syllabus and/or student clinical handbook.

In the event of the college announces a delayed opening:
- Students who are scheduled for classes on campus should follow the college delayed opening schedule per course syllabus.
- Students who are scheduled for clinical start time prior to 9:00 AM should report at 9:00 AM. All other students report at the assigned time.

Program Director/Director of Clinical Education reserves the right to cancel a clinical rotation even if the campus remains open.

Program Director/Director of Clinical Education reserves the right to send students to clinical even if the campus is closed as long as the PD/DCE is available via telephone while the students are in clinical and as long as there are clinical instructors/preceptors present at the site.

WEATHER EMERGENCY ANNOUNCEMENTS
Students scheduled to attend class on campus:
- **Subscribe to E2Campus** for the campus where classes originate and check emails/text messages for notices of cancellation/delay.
- Listen to designated radio/TV stations or refer to the HACC website at www.hacc.edu.

Students scheduled to attend a clinical experience:
- **Subscribe to E2Campus** for the campus where classes originate and check emails/text messages for notices of cancellation/delay.
- Follow program procedure for clinical cancellation or delay as stated in the course syllabus and/or student clinical handbook. Program will utilize a communication method (i.e. phone chain, recorded message on program voice mail, email or text message notification).
- Students are responsible for maintaining accuracy of their contact information with the program director.

9/3/07 Rev 5/31/12
Definitions:

**Readmission** – A student requesting to return to the ADN or PN Program within 2 calendar years of leaving.

**Transfer Student** - a student requesting credit for a nursing course completed at another generic nursing program or movement from one HACC nursing campus to another.

**LPN Transitional Track** – a Licensed Practical Nurse requesting to begin the Associate Degree Program at a level above fundamentals.

Students requesting readmission to the first semester of nursing courses in either the PN or ADN Nursing Programs

A student who earns a ‘D’, ‘W’, ‘F’ or is withdrawn from NURS 100 or NURS 140 + NURS 142 + NURS 143 (all three) and wishes to return must reapply using the Online Application for Admission, (found on HACC WEB), and meet the points criteria applied to all applicants for the program in that admission cycle. This student is not eligible for readmission, but instead must reapply to the nursing program.

Students requesting readmission to courses in subsequent semesters

A student, who earns a ‘D’, ‘W’, ‘F’ or is withdrawn from any other nursing course and desires to be readmitted, must **personally** submit a completed **Request for Readmission Form** to the Nursing Office at the campus to which he/she is requesting readmission. Forms are available in any of the Nursing offices.

1) A PN student who earns a ‘D’, ‘F’, or ‘W’ in a nursing course for the second time is not eligible for readmission or reapplication to that program.

2) An ADN student with ‘D’s, ‘F’s or ‘W’s combined, for a total of six (6) or more credits in any nursing courses required for graduation OR who earns a ‘D’, ‘F’, or ‘W’ in the same nursing course for the second time will not be eligible for readmission to that program.

   a) Students who have been unsuccessful in the ADN program and cannot be readmitted, may readmit to the PN program under the following conditions:

   i) They must meet with nursing faculty to discuss their options. This can be either their course instructor or the Campus Director/Director of Clinical Nursing Education

   ii) Complete a readmission paper indicating their desire for admission into the PN program.

   iii) Be admitted into the correct PN class based on the following:

      1 Students who have partially passed the N140 series with a C or better can readmit to N100

      2 Students who have successfully passed N150 with a C or better can readmit to N101
3 Students who have successfully passed N242, N243, and N244 with a C or better may readmit to N102
4 A student who has failed N140, N142, and N143 must go through the online application process for admission into the PN program.

b) If the student has a subsequent failure or withdrawal from the PN program, he/she will not be eligible for readmission to any clinical nursing courses offered at any HACC campus.

c) If the student successfully completes the HACC PN program, he/she is permitted to complete a request for readmission form seeking readmission into the ADN Program as an advanced standing LPN.

d) If approved, the student will enter the ADN Program in the course (or its equivalent) that would follow the last course in which the student was successful.

i) Once readmitted to the ADN program as an advanced standing LPN, if the student earns a ‘D’, ‘W’, ‘F’ for a combined total of six or more credits in any nursing courses required for graduation OR who earns a ‘D’, ‘F’, or ‘W’ in the same nursing course for the second time in the ADN program, the student will not be eligible for readmission to the ADN program at any HACC campus.

Exception to the Readmission Policy: A student who is diagnosed with a medical condition or documented family emergency requiring immediate withdrawal from the program may be considered for readmission to the same program. The student will meet with the director on his/her campus to discuss this exception. Decisions will be made on a case by case basis. In the event an exception is made, all other criteria, priorities and time-lines will apply. This will be considered Medical Leave (ML) and students will follow that procedure. If a student wishes to inquire about a tuition refund for medical purposes, the campus finance office should be contacted. **Any requests for medical leave must be submitted along with the appropriate documentation to the Campus Nursing Director prior to the final exam. If approval is given by the Nursing Operations Team, the student can complete the petition for retroactive withdrawal for an exception to the drop and refund deadline.

Readmission Timeline

All readmissions and transfers into a clinical course sequence in either program will be permitted based on the following criteria:

Readmission within 1 year:
(Based on the semester the student left the clinical program)
May re-enter and repeat the course, based on space available
1) Satisfactory validation of selected skills by demonstration in nursing skills laboratory and achieving a 100% on the dosage calculation exam following established protocol. Students who are unable to demonstrate skill competency after two attempts must enroll to audit the appropriate skills course.
2) Failure to keep the scheduled appointment will incur a charge of $150 for validation unless 24 hour notice has been given.
3) Appropriately submitted and approved background checks and drug screen

**Readmission within 2 years:** *(based on the semester the student left the clinical program)*

1) The student may readmit and repeat the course based on space availability.
2) Satisfactory validation of selected skills by demonstration in nursing skills laboratory and 100% on the dosage calculation exam of the previous level. Students who are unable to demonstrate competency after two repeat attempts must enroll to audit the appropriate course.
3) Failure to keep the scheduled appointment will incur a charge of $150 for validation unless 24 hour notice has been given.
4) Appropriately submitted and approved background checks and drug screen.
5) Testing to validate knowledge necessary for successful readmission will be required as indicated below:
   a) Achieve at least Level 1 proficiency on the ATI Fundamentals Exam to enter Nursing 150 or Nursing 151.
   b) Achieve at least Level 2 proficiency on the ATI Fundamentals Exam to enter Nursing 240 or Nursing 241.
   c) Achieve at least Level 1 proficiency on the ATI Adult Medical Surgical Exam to enter Nursing 250.
   d) Achieve at least Level 2 proficiency on the ATI RN Adult Medical Surgical Exam to enter Nursing 251.
   e) Achieve at least Level 1 proficiency on the ATI PN Fundamentals Exam to enter N 100.
   f) Achieve at least Level 2 proficiency on the ATI PN Fundamentals Exam to enter N 101 or 102.

**Readmission after 2 calendar years:** *(based on the semester the student left the clinical program)*

A student requesting readmission to the ADN program after 2 calendar years will be directed to apply to the clinical program using the **Online Application for Admission**, *(found on HACC WEB)*, meet the points criteria applied to all applicants for the program in that admission cycle and if accepted, begin the clinical course sequence with the first semester courses.

**Readmission after 7 calendar years:** *(based on the semester the student left the clinical program)*

If more than 7 calendar years have elapsed since the student was unsuccessful in either program, the student can return as a new applicant following all of the established criteria detailed on HACCWeb.

**Decisions for Readmission**
Decisions for readmission, LPN Transitional Track and transfer students are made by the Nursing Directors on the respective campus, or the Nursing Operations Team.

**Readmission Consideration is based on:**
- Availability of space in the requested course and semester on the campus indicated on the readmission/transfer form.
- Overall HACC Grade Point Average (GPA) 2.0 or higher
- Date of readmission request

**Priority for available spaces will be given based on the following criteria:**

<table>
<thead>
<tr>
<th></th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>1.</td>
<td>Students returning from medical leave</td>
</tr>
<tr>
<td>2.</td>
<td>HACC nursing students seeking transfer to another HACC Campus</td>
</tr>
<tr>
<td>3.</td>
<td>Students seeking readmission to the same campus</td>
</tr>
<tr>
<td>4.</td>
<td>Students seeking readmission to another HACC Campus</td>
</tr>
<tr>
<td>5.</td>
<td>Students seeking to transfer into HACC’s nursing program from another college or institution.</td>
</tr>
</tbody>
</table>

*** Completing a readmission application and returning the application to the Nursing office of the desired campus, does not constitute the student being readmitted into any HACC nursing program. Students will be informed by the director responsible for readmission applications if their request for readmission is approved or denied and the reason for denial.
The Student Nurses Organization is an organization that has the full approval of the Student Government Association of the HACC.

Activities in which the students have engaged include:
* Volunteering at local community agencies
* Meetings for all nursing and pre-nursing students to discuss the problems and joys of being in the Nursing Program
* Formation of study groups
* Blood pressure screening on campus
* Striping Ceremony for First Level and Pinning Ceremony for Second Level
* Attending Student Nurse Association of PA Convention
* Attending National Student Nurse Association Convention

(These are but a few of the activities--with more in the planning--for the academic year.)

HARRISBURG CAMPUS
Sharon Fronko, Associate Professor of Nursing, SMHEP 218F
