RN/LPN REFRESHER PROGRAM

The HACC RN/LPN Reactivation & Refresher programs are for RNs and LPNs who have an inactive/lapsed license wishing to reinstate their license as well as those RNs and LPNs wishing to refresh their skills before returning to the clinical setting. The programs prepare individuals for return to nursing practice and those preparing to take the NCLEX exam. The curriculum focuses on the nursing process, current nursing practices, trends, ethical/legal issues, pharmacology and clinical management of patients. Attention is given to a variety of aspects including: assessment skills, care plans, infection control, technological advancements, quality assurance and drug administration.

Instructors are experts in the field of nursing and education and will assist and guide students in returning to active participation in the nursing profession. Through classroom lectures and hands on labs, students will have the opportunity to refresh their skills, build their confidence and gain insight into new techniques and technology.

**Program Length:** This program is designed to be completed in 6 weeks or less for those students taking the classroom/lab portion of the program to refresh their skills.

**Program cost for refresher students without a clinical experience:** $1,895 (includes the cost of textbooks, lab supplies and predictor exam).

**ADDITIONAL PROGRAM INFORMATION**

**Student dress code:**
Students will be required to wear scrub pants and top when performing lab skills. Students will also be required to wear appropriate footwear in the lab with a closed toe and closed heel. No clogs are permitted.

**Textbooks:**
Textbooks are required but will be provided on your first day of class.
