OSHA Training Institute Partnership

Course Descriptions:

OSHA 7100-Introduction to Machinery and Machine Safeguarding:

This course covers the process to identify, select and properly safeguard machinery to protect employees and others in the work area and deliver appropriate training in safe work practices. Course topics include types of machinery requiring guarding, point of operation, emergency eyewash/shower requirements, hazard communication, OSHA Machinery and Machine Guarding Standards violations, and corrective actions. Upon course completion students will have the ability to explain hazardous actions and motions of various types of machinery, identify methods of safeguarding, and match identified safeguards with the applicable OSHA Machinery and Machine Guarding Standards to reduce and eliminate the potential for accidents and injuries.

Student Contact Hours: 4

Prerequisites: None

OSHA 7505-Introduction to Incident (Accident) Investigation:

This course covers an introduction to basic accident investigation procedures and describes accident analysis techniques. Course topics include reasons for conducting accident investigations, employer responsibilities related to workplace accident investigations, and a six-step accident investigation procedure. The target audience is the employer, manager, employee or employee representative who is involved in conducting accident and/or near-miss investigations. Upon course completion students will have the basic skills necessary to conduct an effective accident investigation at the workplace.

Student Contact Hours: 7.5

Prerequisites: None

Course Includes: Student binder, Lunch and Refreshments for in-person classes

OSHA 7120-Introduction to Combustible Dust Hazards:

This course covers the hazards posed by combustible dust within general industry. Course topics include recognizing the hazards and risks associated with combustible dust, control of electrical installation hazards, and developing controls and strategies to prevent or mitigate combustible dust fires and explosions. Upon course completion the student will have the ability to utilize strategies that assure employee safety while using or producing materials that generate combustible dust and the ability to use OSHA Standards, National Fire Protection Association (NFPA) Standards, and other applicable consensus standards that impact industries which generate combustible dust.

Student Contact Hours: 6.5

Prerequisites: None

Course Includes: Course material

OSHA 7500-Introduction to Safety and Health Management:

This course covers the effective implementation of a company's safety and health management system. The course addresses the four core elements of an effective safety and health management system and those central issues that are critical to each element's proper management. This course is an interactive training session focusing on class discussion and workshops. Upon course completion students will have the ability to evaluate, develop, and implement an effective safety and health management system for their company.

Student Contact Hours: 7.5

Prerequisites: None

Course Includes: Student binder, Lunch and Refreshments.

OSHA 7845-Recordkeeping Rule Seminar:

This course covers OSHA requirements for maintaining and posting records of occupational injuries and illnesses and reporting specific cases to OSHA. Upon course completion students will have the ability to identify OSHA requirements for recordkeeping, posting and reporting and to complete OSHA Form 300 *Log of Work-Related Injuries and Illnesses*, OSHA Form 300A *Summary of Work-Related Injuries and Illnesses*, and OSHA Form 301 *Injury and Illness Incident Report*.

Student Contact Hours: 6

Prerequisites: None

Course Includes: Student materials
