

HEALTHCARE MANAGEMENT, Associate in Applied Science Degree - 3606

Health Careers Department

CIP Code: 51.0701

The Healthcare Management AAS degree prepares students for entry-level management positions within the healthcare industry including practitioner offices, holistic health practices, long-term care facilities, and wellness centers. Students are able to apply principles in the dynamic and growing healthcare industry. The complete program is available at all of HACC's campuses through various modalities (e.g., on-campus/in-person instruction, hybrid, synchronous remote instruction and/or asynchronous instruction).

Career Opportunities

Graduates prepare for entry-level positions in healthcare organizations with career paths leading to medical practice and medical office management positions. The program also prepares currently employed healthcare clinicians for management positions in the healthcare industry.

Competency Profile

This curriculum is designed to prepare students to:

- Communicate effectively and professionally in healthcare management situations through writing, speaking, and electronic media
- Use quantitative and qualitative tools and methodologies to support healthcare management decision making
- Describe economic, environmental, political, ethical, legal, and regulatory contexts of healthcare management policies
- Evaluate healthcare management issues including financial, legal, operational, and administrative procedures
- Use team building skills in the accomplishment of group goals and objectives
- Work effectively, respectfully, ethically, and professionally with people of diverse ethnic, cultural, gender, and other backgrounds and with people who have different organizational roles, social affiliations, and personalities
- Solve problems related to healthcare management using critical thinking skills
- Utilize research methods to collect and analyze information regarding healthcare management concepts
