

HEALTH SCIENCE, Associate in Applied Science Degree - 3656

Health Careers Department

CIP Code: 51.2211

The Health Science AAS program is a degree-completion program designed specifically for actively credentialed, or licensed, health care professionals currently working in their fields. Students select courses from one of the three areas of concentration:

EFDA/Dental Assistant, Management/Marketing and Social Services.

Each student's credential and employment verification letter must be received and reviewed. After evaluation, qualified applicants are awarded 30-credits towards the Health Science degree. **This is a selective admissions program.** This program can be completed at all of HACC's campus locations through various modalities (e.g., on-campus/in-person instruction, hybrid, synchronous remote instruction and/or asynchronous instruction). All of the EFDA courses offered within the Dental Assistant Expanded Functions concentration can be completed at the Harrisburg Campus through on-campus/in-person instruction.

Selective Program: Entry into this program is not guaranteed with admission to the College; specific admissions criteria must be met. Please see the Health Careers website (www.hacc.edu/healthcareers), or contact us by email at: start@hacc.edu for specific information on program entry requirements.

Career or Transfer Opportunities

Graduates are qualified to seek employment in the Dental Assistant, Management/Marketing, Paramedic and Gerontology areas or to pursue further academic study. This program also prepares currently employed healthcare clinicians for upward mobility within their organizations.

Competency Profile

This curriculum is designed to prepare students to:

Expanded Function Dental Assistant (EFDA) Concentration

- Apply concepts of restorative terminology, tooth anatomy, and restorative dental materials to restorative procedures
- Demonstrate skills to meet the requirements established by the Pennsylvania State Board of Dentistry
- Demonstrate basic competency for placing and finishing amalgam and composite resin restorations on patients
- Demonstrates ethical conduct in restorative care and decision making
- Write and speak effectively

Management/Marketing Concentration

- Demonstrate competencies needed to gain employment in the physician practices, hospitals, or vendors in the medical areas
- Demonstrate proficiency in all aspects of medical management for the hospital and/or physician practice
- Demonstrate the concepts of marketing to target audiences
- Discuss human resource issues in the hospital or medical office
- Incorporate Healthcare Law and Ethics into the changing healthcare environment

Social Services Concentration

- Recognize race and cultural relations as they relate to the health care area
- Demonstrate life cycle development in a variety of patient populations
