

POLITICAL SCIENCE, Associate in Arts Degree - 5026

Social Science Department

CIP Code: 45.1001

The Political Science AA program provides a solid foundation for students who plan to major in Political Science, Public Policy, Public Administration, or International Relations. This program allows students to focus on two areas of study: **Political Science** or **Public Policy**. The **Political Science option** is useful as an arts and science major for a variety of careers such as law, political science, public service, and foreign service. The **Public Policy option** focuses upon the development of skills that lead to careers in federal, state, local or international government. Students may also pursue careers in nonprofit agencies. Since the requirements of senior institutions vary widely, it is essential to choose a transfer institution as soon as possible and carefully follow the program described in that college's catalog. This program may be completed entirely through asynchronous instruction. Also, students may complete this program at the Harrisburg, Lancaster and York campuses through various modalities (e.g., on-campus/in-person instruction, hybrid, synchronous remote instruction and/or asynchronous instruction).

Transfer Opportunities

This transfer curriculum is provided as a guide for students planning to transfer to a baccalaureate degree granting institution majoring in Political Science, Public Policy, Public Administration or International Studies.

Competency Profile

This curriculum is designed to prepare students to:

- Use oral and written communications - proper mechanics, clear wording and logical sequence - to convey knowledge of civics foundation necessary to effectively participate in politics
- Use appropriate technological tools to identify, locate, access, communicate and cite sources of information, including peer reviewed articles
- Critically evaluate information for legitimacy, validity and appropriateness, including partisanship and bias
- Integrate information into projects that involve critical analysis
- Explain terminology, institutions, processes, policy constructs and issues associated with political science/public policy
- Evaluate the current social issues and events and how they correlate to the legislative process and their relevance to society and individual citizens
- Participate in civil discussions with others of diverse viewpoints
- Listen to and evaluate various political views
- Identify Social Science methodologies
- Develop and apply problem solving skills to address issues that arise in one's community
- Identify one's own prejudices and biases to facilitate problem solving skills in one's community
- Actively engage in the community through service projects, internships, case studies, and/or civic participation, in order to identify problems/issues that exist
